

Summary Table: Employment

Released on: 21/9/2026 11:50 AM

The number of persons in employment tells us about the economy's ability to create jobs.

The change in employment sheds light on the impact of economic changes on the labour market. In particular, the breakdown of employment by sectors helps identify sectors where employment is growing or falling.

As part of MRSD's continued commitment to deliver accurate and relevant statistics on the labour market, our data collection processes have undergone an assessment by Ernst and Young Advisory Pte Ltd.

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026
Employment Level as at Year-end ('000)	3,673.1	3,669.4	3,714.8	3,784.3	3,603.3	3,629.5	3,889.8	3,986.4	4,046.2	4,117.0	n.a.

Latest figures published in: [Labour Market Report](#)

Notes:

- Data are compiled primarily from administrative records, with the self-employed estimated from the Labour Force Survey.
- The industries are classified based on SSIC 2020.
- Residents refer to Singapore Citizens and Permanent Residents.
- Change in employment is the difference in the employment level at the end of the reference period compared with the end of the preceding period.
- Data for the three major sectors do not add up to the total as the latter includes Agriculture, Fishing, Quarrying, Utilities and Sewerage & Waste Management.
- 'excl MDW' refers to excluding migrant domestic workers.
- Data may not necessarily add up to total due to rounding.
- Data for Dec 2025 are revised to reflect updates in industry classification of firms.
- p = Preliminary
- n.a. = Not available
