Lift and escalator sector

The PWM is a framework for lift and escalator maintenance employees who are Singapore citizens or permanent residents.

What is it

The **Progressive Wage Model (PWM)** for lift and escalator maintenance workers was developed by the Tripartite Cluster for Lift and Escalator Industry (TCLE). It features:

- **Training requirements** developed by [BCA](#) and ITE in alignment with the Technical Skills and Competencies (TSC) framework. This ensures that workers have the skills they need to carry out their jobs.
- **Progressive wages set at each level.** This ensures that workers are paid wages that correspond to their skills and productivity.

The PWM is mandatory for all lift and escalator maintenance contractors who would like to register or remain registered under [BCA's RW02B and RW03B workheads](#) [↗](#).

Who it covers

The PWM requirements are **mandatory**. They cover all Singapore citizens and permanent residents who are employed in lift and escalator maintenance jobs by lift and escalator companies.

Employers are encouraged to adopt the PWM's principles for their foreign and in-house lift and escalator maintenance workers, upgrade their skills and implement productivity-based wage progression pathways.

Employees can check their salary information, job details, and if employers are paying them the correct wages using the  **Progressive Wage Portal (PW Portal)**. Refer to the infographic for an **overview of the PW Portal**.

Training requirements

To improve the lift and escalator service industry through upskilling, BCA and ITE are working closely to develop and launch training and certification courses in alignment with the Technical Skills and Competencies (TSC) framework.

As an employer, you will benefit from your lift and escalator maintenance employees' increased productivity and ability to provide higher services.

Find out about the available courses in the **PWM Skills Ladder of NTUC's Brochure** .

Raising annual leave entitlement for outsourced PWM workers

From 2029 onwards, the **minimum annual leave entitlement for outsourced PWM workers will be increased** from **7 days to 10 days**. The enhancement will be implemented in phases and will support outsourced workers across the cleaning, security, landscape, lift and escalator, and waste management sectors. The implementation timeline will be discussed by the respective sectoral Tripartite Clusters, allowing employers and service buyers time to plan for the changes and manage operational and cost impact.
