1. The Tripartite Partners have agreed to expand the Progressive Wage Model (PWM) to a fifth sector – Waste Management. This expansion is a first step in the broader effort by the Tripartite Workgroup for Lower-Wage Workers (TWG-LWW), to develop a multi-year roadmap to uplift the employment outcomes and well-being of lower-wage workers (LWWs).
2. Up to 3,000 local workers in Waste Management will be covered and benefit from the PWM, first proposed by NTUC in 2020. Similar to the PWMs in Cleaning, Security, Landscape, and Lift & Escalator sectors, the Waste Management PWM will provide a clear career progression pathway for workers in the sector to earn better wages as they improve their skills and productivity.
3. To oversee the implementation of the PWM, the Tripartite Partners have formed the Tripartite Cluster for Waste Management (TCWM). The TCWM, chaired by Mr Fahmi Aliman, Director, Operations & Mobilisation, NTUC, and co-chaired by Mr Felix Loh, Deputy Honorary Secretary, SNEF, will comprise representatives from service buyers, service providers, unions, and government agencies. The full composition of the TCWM is in **Annex A**.
4. The TCWM will develop the job ladders, training requirements and wage benchmarks of the PWM. It will consult multiple stakeholders in the process, to help ensure that the PWM is tailored to the unique conditions of the sector and benefits all stakeholders – workers can upskill and enjoy higher wages, employers can raise the productivity of their operations, and service buyers can benefit from improved services. The complete Terms of Reference of the TCWM are in **Annex B**.
5. The TCWM targets to issue its recommendations for the PWM in the second half of 2021.

Annex B

The TCWM's Terms of Reference are to propose interventions and mechanisms that will:

1. Develop and periodically review the progressive wage model (PWM) for waste management workers, including the wages, wage ladders, training requirements and progression pathways;
2. Develop strategies to support progression up the PWM career ladder, such that waste management workers' wages can increase with better training, higher responsibilities and improvements in productivity and standards;
3. Monitor compliance with the PWM and its impact on the industry; and
4. Review ways to improve working conditions of waste management workers.
