MISSION

*To provide timely and reliable
national statistical information on the labour market
to facilitate informed decision making within the government and community at large*

Statistical activities conducted by the Manpower Research and Statistics Department are governed by the provisions of the Statistics Act (Chapter 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Director, Manpower Research and Statistics Department. Extracts of the Act are available in the Department's Internet website at www.mom.gov.sg/mrzd.

PREFACE

The *Report on Wages in Singapore, 2007* is the twenty-second edition published by the Manpower Research and Statistics Department of the Ministry of Manpower. This Report presents the main findings of the *Survey on Annual Wage Changes, 2007* and the *Occupational Wage Survey, 2007*. The Report also contains wage data collected by the Central Provident Fund Board and various institutions of higher learning. The *National Wages Council (NWC) Wage Guidelines For 2008/2009* is also included in this Report.

The Report consists of 5 parts, totalling 210 pages. Part I highlights the key survey findings on topics such as total and basic wage changes, bonuses as well as the basic and gross wages of common occupations. Part II gives an overview of the methodology, coverage as well as concepts and definitions used in the surveys. Part III presents more detailed occupational wage statistics by gender, age and industry. Part IV provides wage data collected by the Central Provident Fund Board and the various institutions of higher learning. Part V lists the occupations and industries for which wage data are available.

We hope this Report will meet the needs of users for comprehensive and up-to-date wage data. The contents and presentation of the Report are reviewed regularly. We welcome readers' feedback to help us improve the Report. A "Feedback Form" page is enclosed at the end of the publication for readers' use.

We wish to thank the employers who had responded to the surveys and the Nanyang Technological University, National University of Singapore, Singapore Management University, Ngee Ann Polytechnic, Nanyang Polytechnic, Singapore Polytechnic, Temasek Polytechnic, Republic Polytechnic and Institute of Technical Education for their contributions to this publication. We are also grateful to those who have offered valuable comments and suggestions to improve the Report.

PART I

Survey Findings

HIGHLIGHTS

ON ANNUAL WAGE CHANGES, 2007

- Amid the strong economic performance and tight labour market, total wages rose by a 7-year high of 5.9% in 2007, up from 4.5% in 2006. The total wage increase of 5.9% resulted from a basic wage gain of 4.3% and an increase in bonus payout (also known as annual variable component) from 2.18 months in 2006 to 2.36 months in 2007. The rise in annual variable component accounted for 2.3% point of the 5.9% total wage increase. The remaining 3.6% point came from the increase in basic wages, which accounted for 61% of the total wage gain in 2007, lower than 69% in 2006.
- Labour productivity contracted by 0.9% in 2007 after experiencing slowing growth in the preceding two years. After adjusting for higher inflation, real total wages rose by 3.8% and real basic wages by 2.2%. Consequently, real wages outpaced productivity growth in 2007 for the third consecutive year. To minimize cyclical effects, productivity trends are often analysed over a longer period, preferably over the course of a business cycle. Over a longer period of five years or more, the growth in productivity had kept pace with gains in wages.
- As at December 2007, 84% of the workforce in the private sector was under some form of flexible wage system¹, up slightly from 83% a year ago but significantly higher than 76% in June 2004 when the data was first collected. Large establishments (employing 200 or more employees) continued to lead in the implementation, with the vast majority (89%) of their workforce having at least one key wage recommendation in their wage system. Although the share was lower at 77% in small and medium enterprises (SMEs employing 25-199 employees), this was a significant progress from 73% in December 2006 and 63% in June 2004.
- The more common recommendation adopted by the private sector was in having a narrow maximum-minimum salary ratio, followed by linking variable bonus to Key Performance Indicators (KPI). In December 2007, 62% of employees were working in establishments that had narrowed/were narrowing the wage ratio for the same job to 1.5 or less and 52% were in establishments that had variable bonus linked to KPI. The proportion of workforce employed in establishments with Monthly Variable Component (MVC) in their wage structure was lower at 35%, after declining slightly from 37% the year before, amid the churn in companies. Both the larger and unionised establishments continued to lead in adopting each of the three recommendations.
- In 2007, more private establishments (18%) that employed low wage workers adopted the National Wages Council's recommendation to pay higher wage increases to these employees, compared with 16% in 2006 and 15% in 2005. The practice was more prevalent for unionised (40%) than non-unionised (17%) sector, with the former (+7.3% point) also experiencing a higher increase over the year than the non-unionised (+1.6% point) establishments.

¹ Establishments are considered to have some form of flexible wage system when their wage structure incorporates at least one key wage recommendation.

SURVEY FINDINGS ON ANNUAL WAGE CHANGES, 2007

1 INTRODUCTION

This report examines the wage changes and extent to which employers have adopted the recommendations of the National Wages Council (NWC) in 2007. The findings are based on data from the Survey on Annual Wage Changes, 2007.

2 WAGE CHANGES

Overview

The robust economic performance has led to improved profitability for firms and another record-breaking year for job creation in 2007. Amid the tight job market, total wages comprising basic wages and bonuses in the private sector rose by 5.9%, notably higher than the 4.5% in 2006¹.

The wage increase in 2007 is the highest in seven years. Nevertheless, the gain is still lower than the annual wage hike experienced during the economic expansion in 2000 (6.6%) and in the 1990s before the Asian crisis (8-10%) ([Chart 1](#)).

¹ The nominal average monthly earnings (AME) based on CPF records rose by 6.2% in 2007. The higher gains in AME against total wage change from the Survey on Annual Wage Changes partly reflected the higher starting salaries amid the tight labour market as new entrants are typically the first to enjoy salary gains than existing employees. (The AME data pertain to all CPF contributors in both full-timers and part-time work, including new entrants who may not be in continuous employment of at least 1 year, unlike the survey data which pertain to full-time employees in continuous employment of at least 1 year).

Chart 1 : Total Wage Change, 1989-2007

Notes : (1) Total wage change data for all employees were available only from 1998 onwards.

(2) Data on rank-and-file were collected from 2000 onwards. Data before 2000 refer to bargainable employees who were also mainly the rank-and-file.

The total wage increase of 5.9% resulted from a basic wage gain of 4.3%, also at a seven-year high and an increase in bonus payout (also known as annual variable component) from 2.18 months in 2006 to 2.36 months in 2007 ([Chart 2](#)). The rise in annual variable component, the highest since comparable data was first collected in 1998, accounted for 2.3% point of the 5.9% total wage increase. The remaining 3.6% point came from the increase in basic wages, which accounted for 61% of the total wage gain in 2007, lower than 69% in 2006.

Chart 2 : Basic Wage Change, 1989-2007

Notes : (1) Basic wage change data for all employees were available only from 1998 onwards.

(2) Data on rank-and-file were collected from 2000 onwards. Data before 2000 refer to bargainable employees who were also mainly the rank-and-file.

After adjusting for higher inflation², real total wages rose by 3.8% in 2007, only slightly higher than 3.5% in 2006. In terms of real basic wages, the rise was in fact lower at 2.2% compared with 2.6% the year before³.

Labour productivity contracted by 0.9% in 2007, after experiencing slowing growth in the preceding two years (1.5% in 2006 and 2.8% in 2005). The last time productivity had contracted was during the economic downturn in 2001. This time round, while there was healthy output growth, it failed to keep pace with the record increase in manpower. Consequently, real wages outpaced productivity growth in 2007 for the third consecutive year.

Chart 3 : Annual Changes in Productivity and Real Wage, 1992-2007

Note : Total and basic wage change data pertain to all employees from 1998 onwards. Before 1998, data pertain to bargainable employees who were also mainly the rank-and-file.

To minimize cyclical effects, productivity trends are often analysed over a longer period, preferably over the course of a business cycle. Over a longer period of five years or more, the growth in productivity had kept pace with gains in total and basic wages ([Table 1](#)).

² Consumer Price Index (CPI) rose from 1.0% in 2006 to 2.1% in 2007, mainly due to increase in food prices, health care cost and "recreation and others" cost.

³ Real total and basic wage rose by 1.9% and 0.3% in 2007, after adjusting for inflation using GDP deflator. GDP deflator which measures the price level of the economy's output rose from 0.6% in 2006 to 4.0% in 2007. However, where purchasing power is concerned, it is preferable to deflate nominal wages by the Consumer Price Index (CPI).

Table 1 : Annualised Growth of Labour Productivity and Real Wage, 2000-2007

	Per Cent		
	Annualised Change From		
	2000-2007 (7 years)	2002-2007 (5 years)	2004-2007 (3 years)
Labour Productivity	2.1	3.0	1.1
Real Total Wage	2.1	2.8	3.7
Real Basic Wage	1.9	1.8	2.5

Note : Shaded cell indicates wage gains outstripping productivity growth.

Although productivity growth has lagged wage increases over the past three years, the strong productivity gains achieved in the earlier years of recovery from the Asian crisis were sufficient to offset the wage gains. Consequently, the cumulative productivity increases since 1997 continued to exceed the rise in cumulative real wages but the gap has narrowed in the recent years ([Chart 4](#)).

Chart 4 : Productivity and Real Wage Indices (1997 =100)

- Notes : (1) The chart shows the cumulative impact of the annual changes in productivity and wages over the years.
 (2) Total and basic wage change data pertain to all employees from 1998 onwards. Before 1998, data pertain to bargainable employees who were also mainly the rank-and-file.

Unit labour cost (ULC) relates total labour cost (comprising wages and salaries, benefits, CPF contributions by employers, foreign workers' levy and skill development levy) to labour productivity⁴. Reflecting the contraction in productivity and higher wage growth amid the tight job market, the overall ULC similarly rose for the third straight year in 2007. The increase at 3.8% is higher than the 0.5% rise in each of the preceding two years but less than 6.5% during the economic downturn in 2001. Nevertheless, over a longer period of five years, the ULC has declined by 0.4% per annum as productivity growth had generally kept pace with the increase in labour cost.

Chart 5 : Change in Unit Labour Cost, 1992-2007

Source : Department of Statistics, MTI

⁴ Unit Labour Cost (ULC) measures the cost of manpower required to produce a unit of output. It is calculated by dividing total labour cost over total output. The ULC will rise if increases in labour cost outstrip productivity gains.

3 TOTAL AND BASIC WAGE CHANGES

Distribution of Total and Basic Wages by Type of Employees

Wages rose for workers across the levels in 2007. Generally, the competition for talent had led to higher total wage increase of 6.9% for junior management and 6.1% for senior management, up from 5.4% and 5.6% respectively in 2006. This time round, the total wage increase of rank-and-file (RAF) employees rose by 5.4% in 2007, up significantly from the annual increase of 3.9% in both 2006 and 2005.

Chart 6 : Total and Basic Wage Change, 2006 and 2007

Distribution of Establishments by Profit Status

Supported by sustained economic growth, 85% of the private establishments reported that they were profitable in 2007, up from the previous year's 81%. The share of profitable establishments is at its highest since 1989 (Chart 7).

Chart 7 : Proportion of Profitable Establishments, 1989-2007

In 2007, almost two in three establishments in the private sector (63%) either outperformed (Category A) or were as profitable as in 2006 (Category B), higher than the 59% in 2006. The share of firms that incurred a loss (Category D) fell from 19% in 2006 to 15% in 2007, while firms that did not do as well as in the previous year (Category C) stabilized at around 22% in 2007 ([Table 2](#)).

Table 2 : Distribution of Establishments by Profit Status, 2006 and 2007

		Per Cent	
Category	Profit Status	2006	2007
All Categories		100.0	100.0
A	Firm was profitable and did much better than in the previous year	27.8	28.0
B	Firm was profitable and did as well as in the previous year	31.4	35.2
C	Firm was profitable but did not do as well as in the previous year	22.2	21.6
D	Firm incurred a loss	18.6	15.1

Note : Figures may not sum up to 100% due to rounding.

Distribution of Establishments by Total and Basic Wages Paid

Responding to NWC's recommendation to grant wage increase to workers for their contributions to good corporate and economic performance, two in three (67%) of the establishments in the private sector raised the total wages of their workers in 2007. These firms gave wage increases averaging 7.5%, higher than the 5.8% in 2006. A small minority (7.9%) of firms cut wages in 2007, but the quantum of wage cut was smaller (-3.1%) than in the year before (-3.4%). The remaining 26% of the firms kept their wages unchanged in 2007 ([Chart 8](#)). The trend for basic wage changes was broadly similar, with only a negligible 0.9% of firms cutting basic wages ([Chart 9](#)).

Chart 8 : Distribution of Establishments by Total Wage Change and Extent of Total Wage Change

Chart 9 : Distribution of Establishments by Basic Wage Change and Extent of Basic Wage Change

Total Wage Change by Profit Status

Wage increases and firm profitability are strongly correlated as many firms have restructured their wage system to tie wages more closely with business performance. In 2007, the highly profitable Category A firms gave the largest total wage increase of 8.5%, followed by Category B firms at 5.1% and Category C at 3.9%. Facing the challenge of a tight labour market, it is noteworthy that even loss-making firms raised total wages by 3.0% to retain their workers, up from 2.3% in 2006 ([Chart 10](#)).

Chart 10 : Total Wage Change by Profit Status for All Employees, 2006 and 2007

Category A : Firm was profitable and did much better than in the previous year

Category B : Firm was profitable and did as well as in the previous year

Category C : Firm was profitable but did not do as well as in the previous year

Category D : Firm incurred a loss

Total Wage Change by Firm Size

The sustained economic growth has filtered down to establishments across the various sizes, with most of them paying higher wage increase than in 2006. This was led by the larger establishments employing 200 and more workers, where total wage increase averaged 7.0% in 2007, up from 4.6% in 2006 ([Chart 11](#)).

Chart 11 : Total Wage Change by Firm Size, 2004-2007

Total and Basic Wage Change by Industry

All major industries, except for *information & communications* and *administrative & support services*, gave higher total wage increase than a year ago. The lower wage rise in *information & communications* resulted mainly from the moderation in wage gain in the *publishing and motion picture, media & broadcasting* activities after the high wage increase in the year before. The *administrative & support services* comprising lower valued-added services such as security agencies, travel agencies, building–cleaning, call centre service paid out the least wage increase of 3.5%, marginally lower than in 2006 (3.6%). The total wage increase was weighed down by the lower wage rise paid to its RAF employees (3.2%), even as they gave slightly higher wage increase to their non-RAF employees (4.7%) in 2007 (Table 3).

Table 3 : Total and Basic Wage Change by Industry, 2006 and 2007

Industry	Period	Per Cent					
		Total Wage Change			Basic Wage Change		
		Total	RAF	NRAF	Total	RAF	NRAF
All Industries	2007	5.9	5.4	6.7	4.3	3.8	5.1
	2006	4.5	3.9	5.5	3.6	3.2	4.2
Manufacturing	2007	4.7	4.5	5.0	3.7	3.4	4.2
	2006	4.2	3.8	4.7	3.2	3.0	3.5
Construction	2007	5.0	4.4	6.1	3.9	3.3	4.7
	2006	3.9	3.4	4.6	2.5	2.3	2.8
Services	2007	6.5	5.9	7.3	4.6	4.0	5.4
	2006	4.7	4.0	5.9	3.9	3.3	4.6

	2006	5.1	4.8	5.6	3.4	3.2	4.0

RAF : Rank-and-file employees

NRAF: Non-rank-and-file employees comprise junior and senior management employees

Note : Industries are classified based on SSIC 2005

4 ANNUAL VARIABLE COMPONENT

In last year's guidelines, NWC had recommended companies to reward workers with higher variable bonuses for their contribution to good corporate and economic performance if built-in wage increase is not sustainable. The private sector paid out an annual variable component (comprising the annual wage supplement and variable bonus) averaging 2.36 months of basic wage in 2007, 8.3% higher than the 2.18 months in the previous year. Overall, annual variable component formed 16.4% of total wages in 2007, up from 15.4% a year ago.

Chart 12 : Annual Variable Component, 1989-2007

Note : Data for all employees are available from 1998 onwards. Prior to this, data for RAF pertain to bargainable employees who were also mainly the rank-and-file.

All employee groups received higher bonus in 2007 than in 2006. Expectedly, the payout for senior (2.51 months or 17% of total wages) and junior management (2.72 months or 19%) were more than RAF employees (2.14 months or 15% of total wages). Typically, annual variable component would be higher for management staff as a greater share of their pay package is flexible and tied to performance.

Chart 13 : Annual Variable Component as a Proportion of Total Annual Wages, 2006 and 2007

Note : Figures in parenthesis refer to annual variable component in months of basic wage

With sustained economic performance, close to one in every two (49%) firms gave out more than one month of annual variable component, up from 46% in 2006 (Table 4). This included 10% of establishments which paid more than three months of annual variable component. On the other hand, the share of firms which did not pay any annual variable component remained around 20% in 2007. On average, these establishments gave a basic wage increase of 2.1% in 2007. The bulk (78%) of them was small establishments with less than 50 employees.

Table 4 : Distribution of Establishments by Quantum of Annual Variable Component Paid, 2006 and 2007

Quantum Paid	Per Cent	
	2006	2007
Total	100.0	100.0
None	20.7	19.7
> 0 to 0.5 months	6.2	5.7
> 0.5 to less than 1 month	7.2	4.4
1 month	20.4	21.5
> 1 to 2 months	21.2	23.8
> 2 to 3 months	13.3	14.6
> 3 months	11.0	10.4

Note : Figures may not sum up to 100% due to rounding.

Annual Variable Component by Profit Status

There is a strong correlation between firms' profitability and bonus payout. The highly profitable firms (Category A) paid the largest quantum (2.80 months of basic wages) while loss-making firms (Category D) gave the least (1.41 months of basic wages).

Table 5 : Annual Variable Component by Profit Status, 2006 and 2007

Category	Profit Status	Months of Basic Wage	
		2006	2007
		Total	Total
	All Categories	2.18	2.36
A	Firm was profitable and did much better than in the previous year	2.52	2.80
B	Firm was profitable and did as well as in the previous year	2.29	2.20
C	Firm was profitable but did not do as well as in the previous year	1.85	2.22
D	Firm incurred a loss	1.12	1.41

62% of the highly profitable (Category A) establishments gave more than one month of basic wages in annual variable component, including 16% that gave more than three months. Among less profitable Category C establishments, the corresponding percentages were 48% and 8.8%. On the other hand, close to one in three (32%) loss-making establishments (Category D) did not pay any annual variable component to their employees. This percentage declined with profitability. Only a minority of Category A (12%) establishments did not pay annual variable component, mainly reflecting a wage structure that does not incorporate payment of bonuses. These establishments gave average basic wage increases of 4.0% in 2007, higher than 3.0% in 2006. The majority (71%) of them were small establishments with less than 50 employees.

Table 6 : Distribution of Establishments by Profit Status and Quantum of Annual Variable Component Paid, 2007

		Per Cent						
Category	Profit Status	Total	None	> 0 to less than 1 month	1 month	> 1 to 2 months	> 2 to 3 months	> 3 months
	All Categories	100.0	19.7	10.0	21.5	23.8	14.6	10.4
A	Firm was profitable and did much better than in the previous year	100.0	12.4	6.7	19.0	23.6	22.0	16.3
B	Firm was profitable and did as well as in the previous year	100.0	19.8	9.4	20.3	26.0	13.8	10.8
C	Firm was profitable but did not do as well as in the previous year	100.0	20.1	10.8	21.7	24.5	14.2	8.8
D	Firm incurred a loss	100.0	32.3	16.5	29.0	17.7	3.5	1.0

Note : Figures may not sum up to 100% due to rounding

Annual Variable Component by Industry

All industries except for *information & communications* and *administrative & support services*, paid higher annual variable component than a year ago. Many industries gave at least two months of annual variable component, except for *administrative & support services* (1.03 months), *construction* (1.30 months), *hotels & restaurants* (1.41 months) and *real estate & leasing services* (1.72 months). *Financial services*, which is known for having a high bonus component in its wages, continued to have the largest bonus payout of 3.63 months in 2007. On the other hand, *administrative & support services* continued to pay the lowest annual variable component (1.03 months) especially for its RAF employees (0.89 months).

Table 7 : Annual Variable Component by Industry, 2006 and 2007

Industry	Period	Months of Basic Wage		
		Total	RAF	NRAF
All Industries	2007	2.36	2.14	2.66
	2006	2.18	1.96	2.51

RAF : Rank-and-file employees

NRAF: Non-rank-and-file employees comprise junior and senior management employees

Note : Industries are classified based on SSIC 2005

5 Wage Increases Paid To Low Wage Workers

The NWC in its 2007/2008 wage guidelines reiterated its concerns for low wage workers and urged companies that were granting wage increases, to give higher increases for low wage workers. This could be done by specifying a higher percentage increase and/or by including a dollar quantum for built-in wage increases or variable bonus payout.

In 2007, more private establishments (18%) that employed low wage workers⁵ adopted the NWC's recommendation to pay higher wage increases to these employees, compared with 16% in 2006 and 15% in 2005. The practice was more prevalent for unionised (40%) than non-unionised (17%) sector, with the former (+7.3% point) also experiencing a higher increase over the year than the non-unionised (+1.6% point) establishments.

Most of these establishments gave the higher wage increases in terms of basic wage (10% of establishments) followed by a combination of basic wage and bonuses (5.0%). A minority (2.6%) paid the higher wage increases in terms of bonuses only (Table 8).

Table 8 : Distribution of Establishments by Whether They Paid Higher Wage Increases to Low Wage Employees, 2005, 2006 and 2007

							Per Cent
Union Status	Period	Total	Establishment Paid Higher Wage Increase to Low Wage Employees				
			Yes				No
			Sub-total	Bonuses (include one-off payment)	Basic Wages	Basic Wages & Bonuses	
All Establishments	2007	100.0	18.1	2.6	10.4	5.0	81.9
	2006	100.0	16.3	1.9	10.3	4.1	83.7
	2005	100.0	14.5	1.7	9.7	3.2	85.5
Unionised Establishments	2007	100.0	40.1	4.6	22.2	13.3	59.9
	2006	100.0	32.8	3.4	20.2	9.2	67.2
	2005	100.0	27.3	4.3	17.1	5.9	72.7
Non-Unionised Establishments	2007	100.0	16.7	2.5	9.7	4.5	83.3
	2006	100.0	15.1	1.8	9.6	3.7	84.9
	2005	100.0	13.7	1.5	9.2	3.0	86.3

Note : Figures may not sum up due to rounding

⁵ Low wage workers generally refer to local employees who earn around \$1,200 or less per month on a full-time basis.

Almost one in every two (48%) establishments which paid higher *basic* wage increases⁶ to their low wage employees did so in the form of a dollar quantum increase. However, unionised and non-unionised establishments adopted different methods. Two-thirds (67%) of the unionised establishments paid higher basic wage increases using a combination of dollar quantum and percentage increase. Non-unionised establishments were more likely to do so in the form of a dollar quantum increase (52%) only.

Table 9 : Distribution of Establishments That Paid Higher Basic Wage Increase to Low Wage Employees by Form of Payment, 2007

Union Status	Total	Establishment Paid Higher Basic Wage Increase to Low Wage Employees		
		Per Cent		
		Percentage Increase Only	Dollar Quantum Increase Only	Combination of Dollar Quantum and Percentage Increase
All Establishments	100.0	19.0	48.2	32.8
Unionised Establishments	100.0	10.6	22.9	66.5
Non-Unionised Establishments	100.0	20.3	52.2	27.5

Note : Figures may not sum up to 100% due to rounding

⁶ The data pertain to establishments that paid higher basic wages or a combination of higher basic wages and bonuses to their low wage employees.

This section of the report updates the progress of firms in adopting the recommendations of the Tripartite Taskforce on Wage Restructuring issued in January 2004. Data on wage restructuring pertain to private sector establishments each employing at least 25 workers.

Target

To ensure sustained competitiveness, the tripartite partners have been working closely to promote and facilitate the implementation of flexible wage systems. Specifically, firms are encouraged to implement the following key wage recommendations:

- (i) implement variable bonus linked to Key Performance Indicators (KPI)⁷;
- (ii) introduce the Monthly Variable Component (MVC) in wage structure;
- (iii) narrow the maximum-minimum salary ratio for the majority of their employees to an average of 1.5 or less⁸.

Recognising that firms may require different forms of wage flexibility to meet their specific circumstances, employers may choose to implement only the recommendations that are relevant to them.

Progress of Key Wage Recommendations

As at December 2007, 84% of the workforce in the private sector was under some form of flexible wage system⁹, up slightly from 83% a year ago but significantly higher than 76% in June 2004 when the data was first collected ([Table 10](#)). Large establishments (employing 200 or more employees) continued to lead in the implementation, with the vast majority (89%) of their workforce having at least one key wage recommendation in their wage system. Although the share was lower at 77% in small and medium enterprises (SMEs employing 25-199 employees), this was a significant progress from 73% in December 2006 and 63% in June 2004.

The unionised sector continued to outperform the non-unionised sector in the implementation of wage flexibility. Nearly all (96%) the workforce in unionised establishments were under some form of wage flexibility compared to only 78% in the

⁷ In the survey, establishments are considered to have implemented variable bonus linked to KPI, if they have formulated and communicated to their employees, the KPI for the payment of the variable bonus.

⁸ Establishments can decide on appropriate ratio for different jobs and industries. In the survey, establishments are considered to have implemented this recommendation if they have narrowed the salary ratio to 1.5 or less, decided to/in the process of narrowing the salary ratio or all along have a maximum-minimum ratio at 1.5 or less.

⁹ Establishments are considered to have some form of flexible wage system when their wage structure incorporates at least one key wage recommendation.

non-unionised sector. Still, the share in the non-unionised sector had improved from 76% in December 2006 and 66% in June 2004.

Around one in every five private sector employees (19%) was in establishments that had a fully flexible wage system comprising all three key wage recommendations in 2007. Including employees in establishments with two recommendations (27%), close to one in every two private sector employees (46%) were in establishments that had implemented at least two wage recommendations in 2007, same as in 2006.

Table 10 : Proportion of Employees by Number of Key Wage Recommendations Implemented, 2004-2007

Employees	Period	All Employees	Some Form of Wage Flexibility (A) + (B) + (C)	Number of Key Wage Recommendations Implemented			
				Three (A)	Two (B)	One (C)	None (D)

	Jun 04	100.0	66.2	4.3	18.6	43.3	33.8

Note : Figures may not sum to 100% due to rounding

Information & communications (93%), *community, social & personal services* (92%) and *financial services* (91%) had among the highest share of employees with some form of wage flexibility while *marine* (74%), *construction* (71%), *real estate & leasing services* (73%) industry had the least. Marine and construction industry are less likely to implement the wage recommendations because of their high reliance on foreign workers. Excluding these two industries, the proportion of workforce in the private sector with at least one wage recommendation rose to 87% in 2007 compared with 84% when they were included. Likewise, the share of employees with at least two wage recommendations rose to 53% from 46%.

In terms of full implementation of all three wage recommendations, *transport & storage* (40%) took the lead followed by *hotels & restaurants* and *community, social & personal services* (35%) and *financial services* (31%). Separately, *financial services* (65%) had the highest share of employees with at least two wage recommendations. Details are in [Table 2 in Appendix 1](#).

In 2007, 16% of the workforce in the private sector was working in establishments that had yet to implement any of the key wage recommendations ([Table 11](#)). The bulk of them, representing 12% of all private sector employees, were working in establishments that were satisfied with their wage flexibility as employers felt they could reward/cut wages based on company performance without the flexible wage components recommended by the taskforce. In some of the establishments, the existing wage systems were already inherently flexible (e.g. a sizeable component of the wages is commission-based). The remaining establishments that were not satisfied with the flexibility of their wage system but had yet to implement the taskforce recommendations employed only 4.5% of the workforce.

On average, 96% of the private sector workforce were in establishments with some form of wage flexibility (84%) or were satisfied with the wage flexibility of the establishments even though their establishments have yet to implement any key wage recommendations (12%). The gap was smaller between larger (97%) and smaller (93%) as well as unionised (100%) and non-unionised establishments (94%).

Table 11 : Proportion of Employees in Establishments That Did Not Implement Any of the Key Wage Recommendations, 2004-2007

Employees	Period	Did Not Implement Any Wage Recommendation	Satisfied/Not Satisfied With Level of Flexibility in Wage System	
			Satisfied	Not Satisfied
All Industries	Dec 07	16.3	11.8	4.5
	Dec 06	16.7	11.4	5.3
	Dec 05	18.9	13.2	5.7
	Jun 05	17.4	10.6	6.8
	Dec 04	18.7	11.8	6.8
	Jun 04	24.4	14.9	9.5
<i>By Establishment Size</i>				
25-199 Employees	Dec 07	23.1	16.2	7.0
	Dec 06	26.6	18.3	8.3
	Dec 05	31.7	21.4	10.3
	Jun 05	27.1	16.6	10.5
	Dec 04	27.9	16.8	11.1
	Jun 04	36.9	20.9	16.0

	Dec 06	9.9	6.7	3.2
	Dec 05	9.8	7.3	2.5
	Jun 05	10.3	6.2	4.1
	Dec 04	10.8	7.6	3.2
	Jun 04	15.0	10.4	4.6
<i>By Union Status</i>				
Unionised Establishment	Dec 07	4.0	3.5	0.5
	Dec 06	3.5	3.0	0.5
	Dec 05	3.4	2.8	0.7
	Jun 05	3.5	1.8	1.7
	Dec 04	6.6	5.1	1.5
	Jun 04	6.9	4.0	2.9
Non-Unionised Establishment	Dec 07	21.8	15.5	6.3
	Dec 06	23.6	15.8	7.8
	Dec 05	26.8	18.5	8.3
	Jun 05	25.1	15.5	9.6
	Dec 04	24.4	15.0	9.4
	Jun 04	33.8	20.8	13.1

Note : Figures may not sum up due to rounding

The majority of the establishments that were not satisfied with their wage flexibility revealed that they would not be implementing the recommendations of the taskforce (Table 12). They employed 2.6% of the workforce and were mainly SMEs (90%) and non-unionised (98%).

Table 12 : Proportion of Employees in Establishments Without Any Key Wage Recommendations and Not Satisfied With Level of Wage Flexibility by Intention to Implement Wage Recommendations, 2004-2007

Employees	Period	Not Satisfied With Wage Flexibility	Intention to Implement Wage Recommendations		
			Yes	No	Not Aware

	Jun 04	4.6	1.1	3.2	0.3
<i>By Union Status</i>					
Unionised Establishment	Dec 07	0.5	0.2	0.1	0.2
	Dec 06	0.5	0.1	0.2	0.1
	Dec 05	0.7	0.3	0.2	0.2
	Jun 05	1.7	0.4	1.2	-
	Dec 04	1.5	0.7	0.7	0.1
	Jun 04	2.9	1.3	1.6	-
Non-Unionised Establishment	Dec 07	6.3	0.5	3.8	2.0
	Dec 06	7.8	0.8	5.5	1.5
	Dec 05	8.3	0.6	5.8	1.8
	Jun 05	9.6	0.7	6.7	2.2
	Dec 04	9.4	0.9	6.5	2.1
	Jun 04	13.1	1.1	9.2	2.8

Note : Figures may not sum up due to rounding

The more common recommendation adopted by the private sector was in having a narrow maximum-minimum salary ratio, followed by linking variable bonus to KPI. In December 2007, 62% of employees were working in establishments that had narrowed/were narrowing the wage ratio for the same job to 1.5 or less and 52% were in establishments that had variable bonus linked to KPI. The proportion of workforce employed in establishments with MVC in their wage structure was less at 35%, after declining slightly from 37% the year before, amid the churn in companies. Both the larger and unionised establishments continued to lead in adopting each of the three recommendations.

Table 13 : Proportion of Employees by Key Wage Recommendations, 2004-2007

Per Cent				
Employees	Period	Max-Min Ratio	MVC	Variable Bonus Linked to KPI
All Industries	Dec 07	62.4	34.7	51.9

	Dec 05	53.8	17.1	41.8
	Jun 05	56.7	20.4	41.5
	Dec 04	58.3	15.8	35.9
	Jun 04	48.6	14.0	30.7

Note : Figures do not sum up to 100% as establishments can implement more than one key wage recommendation

Maximum-Minimum Ratio

The Tripartite Taskforce on Wage Restructuring recommended narrowing the maximum-minimum salary ratio of employees to 1.5 or less so that workers' wages are linked more closely to their job value. In December 2007, slightly over three out of every five establishments (62%) had narrowed/were narrowing the wage ratio for the same job to 1.5 or less, up from 58% in December 2006 ([Table 14](#)). These establishments employed 62% of the private sector workforce in 2007, compared with 60% a year before ([Table 13](#)).

Table 14 : Proportion of Establishments That Had Narrowed or Were Narrowing the Maximum-Minimum Salary Ratio to 1.5 or Less, 2004-2007

Establishments	Period	Per Cent
		Had Narrowed / Were Narrowing the Max-Min Salary Ratio to 1.5 or less
All Industries	Dec 07	61.6
	Dec 06	58.0
	Dec 05	53.0
	Dec 04	56.5
<i>By Establishment Size</i>		
25-199 Employees	Dec 07	61.8
	Dec 06	57.6
	Dec 05	51.9
	Dec 06	56.2
200 or More Employees	Dec 07	60.2
	Dec 06	61.3
	Dec 05	60.6
	Dec 04	59.0
<i>By Union Status</i>		
Unionised Establishments	Dec 07	64.0
	Dec 06	63.9
	Dec 05	62.4
	Dec 04	60.6
Non-Unionised Establishments	Dec 07	61.3
	Dec 06	57.3
	Dec 05	51.8
	Dec 04	56.1

Overall, establishments had a salary range of 1.55 for their RAF workers, comparable to the 1.54 recorded a year ago ([Table 15](#)). The spread was wider in unionised (1.61) and large establishments (1.58) compared to non-unionised (1.52) and smaller establishments (1.50). Expectedly, the maximum-minimum salary ratio was lower in establishments that were narrowing or had narrowed the salary range at 1.43 in 2007, down slightly from 1.45 in 2006.

Table 15 : Average Maximum-Minimum Salary Ratio of Rank-and-File Workers, 2004-2007

Max-min Ratio	Period	Rank-and-File					
		All Establishments		Unionised Establishments		Non- unionised Establishments	
		Total	Had narrowed / were narrowing	Total	Had narrowed / were narrowing	Total	Had narrowed / were narrowing
All Industries	Dec 07	1.55	1.43	1.61	1.55	1.52	1.37
	Dec 06	1.54	1.45	1.62	1.56	1.50	1.37
	Dec 05	1.56	1.48	1.63	1.58	1.52	1.40
	Dec 04	1.59	1.47	1.66	1.60	1.56	1.41
<i>By Establishment Size</i>							
25-199 Employees	Dec 07	1.50	1.34	1.61	1.48	1.49	1.33
	Dec 06	1.51	1.36	1.63	1.51	1.50	1.34
	Dec 05	1.52	1.38	1.63	1.55	1.51	1.36
	Dec 04	1.55	1.37	1.63	1.51	1.54	1.36
200 or More Employees	Dec 07	1.58	1.49	1.62	1.56	1.56	1.42
	Dec 06	1.57	1.50	1.62	1.57	1.51	1.41
	Dec 05	1.58	1.53	1.63	1.58	1.53	1.46
	Dec 04	1.63	1.55	1.66	1.61	1.59	1.49

Generally, the junior management had a higher maximum-minimum ratio of 1.67 than 1.55 for RAF. This is the case, regardless of union status and employment size of the establishments ([Table 16](#)). Similarly, the maximum-minimum salary ratio for junior management was lower in establishments that were narrowing or had narrowed the salary range at 1.54 in 2007, down from 1.59 in 2006.

Table 16 : Average Maximum-Minimum Salary Ratio of Junior Management Workers, 2004-2007

	Dec 04	1.73	1.65	1.78	1.69	1.68	1.60

Implementation of MVC

The adoption of MVC slipped in 2007, after the rapid gains in the initial years ([Chart 14](#)). As at December 2007, 35% of employees were working in establishments that had adopted the MVC. This is slightly lower than the 37% recorded a year ago, reflecting the churn in firms as more new companies were formed in 2007¹⁰. Nearly one in two (49%) employees in large establishments had MVC in their wage structure, compared with only 14% in the smaller establishments. The unionised sector also far outperformed the non-unionised sector in adopting the MVC, with 75% of unionised employees working in establishments with MVC compared to only 16% for non-unionised employees.

In terms of establishment count, 15% of establishments had implemented MVC, down 1.6% point from a year ago. About six in ten (59%) unionised establishments had MVC, compared with only one in ten (10%) for non-unionised establishments ([Chart 15](#)).

¹⁰ 25,904 companies were formed in 2007, 21% higher than 21,491 formed in 2006 (Source: Department of Statistics, MTI). Generally, new companies are less likely to adopt the key wage recommendations as against existing companies.

Chart 14 : Proportion of Employees in Establishments with MVC by Union Status and Establishment Size, 1999-2007

Note : It is assumed that when an establishment introduces the MVC in its wage structure, it applies to all employees in the establishment. Data for 1999-2003 had been revised to pertain to employees in establishment with at least 25 workers to be comparable with data for 2004 onwards.

Chart 15 : Proportion of Establishments with MVC by Union Status and Establishment Size, 1999-2007

Per Cent

Note : Data for 1999-2003 had been revised to pertain to establishments with at least 25 workers to be comparable with data for 2004 onwards.

Community, social & personal services (70%), *financial services* (64%) and *transport & storage* (52%) had among the highest share of employees with MVC while *construction* had the least (11%) (Table 3 in Appendix 1).

Building Up of MVC as a Proportion of Monthly Basic Wage

In the 2007/2008 wage guidelines, NWC encouraged companies granting built-in wage increase to use the increase to build up the MVC. Those who have yet to introduce MVC were strongly urged to do so, to leverage on the positive economic climate.

In 2007, establishments with MVC set aside 9.2% of monthly basic wages as MVC for the majority of their employees, up from 9.0% in 2006 (Chart 16). This comes close to the 10% target recommended by the Tripartite Taskforce.

Chart 16 : MVC as a Proportion of Monthly Basic Wage, 2006 and 2007

Firms with MVC usually paid higher-than-average annual variable component (3.24 months of basic wages in 2007). Combining the annual variable component and MVC (21.3% and 7.2% of total wages respectively), the MVC-firms on average had 29% of their total wages as variable. This almost hit the target of 30% comprising 20% in annual variable component and 10% in MVC, recommended by the task force. However, taking into consideration non-MVC firms in the private sector, the variable share of total wages amongst all private sector establishments with at least 25 employees was only 21%, comprising an annual variable component of 17.4% and MVC of only 3.1% in 2007.

Triggers for MVC Cuts/Restoration

Apart from the implementation and building up of the MVC, the taskforce also recommends that companies put in place clear and appropriate triggers for MVC cuts and restoration. With appropriate indicators/guidelines, companies can then respond nimbly to business conditions without having to negotiate with workers or unions at every point of a business downturn. As at December 2007, nearly six in ten (58%) employees in MVC firms had indicators/guidelines in their wage structure for the cut and restoration of MVC, broadly similar to 57% the year before.

Table 17 : Distribution of Employees With MVC by With/Without Indicators/Guidelines for the Cut & Restoration of the MVC, 2006 and 2007

		Per Cent	
Employees	Period	Yes	No
All Industries	Dec 07	57.5	42.5
	Dec 06	56.9	43.1
<i>By Establishment Size</i>			
25-199 Employees	Dec 07	55.1	44.9
	Dec 06	52.4	47.6
200 or More Employees	Dec 07	58.0	42.0
	Dec 06	57.9	42.1
<i>By Union Status</i>			
Unionised Establishments	Dec 07	57.0	43.0
	Dec 06	55.7	44.3
Non-Unionised Establishments	Dec 07	58.6	41.4
	Dec 06	59.8	40.2

Note : Figures may not sum up to 100% due to rounding

As at end December 2007, 15% of the firms had implemented MVC while 0.9% had decided to or were in the process of implementation ([Table 18](#)). Another 11% were still assessing the system. The bulk (58%) of the firms had no intention of implementing, comprising 49% of establishments which had concerns over MVC and the remaining 9.2% indicating that their wage structure was already flexible. Another 15% were unaware of the MVC, up from 12% a year ago.

Table 18 : Distribution of Establishments by Intention to Implement MVC, 2006 and 2007

								Per Cent
Union Status	Period	Total	With MVC	Decided /In The Process of Implementation	Still Under Consideration	No Wish to Implement		Not Aware of MVC
						Wage Structure Already Flexible	MVC Related Concerns	
All Firms	Dec 07	100.0	15.3	0.9	10.9	9.2	48.9	14.8
	Dec 06	100.0	16.9	0.8	11.0	9.3	50.4	11.6
Unionised Establishments	Dec 07	100.0	58.7	1.2	9.3	6.5	22.1	2.2
	Dec 06	100.0	58.9	1.2	10.6	6.7	21.3	1.4
Non-Unionised Establishments	Dec 07	100.0	10.3	0.9	11.0	9.5	52.0	16.3
	Dec 06	100.0	11.4	0.8	11.1	9.6	54.2	12.9

Note : Figures may not sum up due to rounding

Table 19 : Proportion of Employees in Establishments by Intention to Implement MVC, 2006 and 2007

								Per Cent
Union Status	Period	Total	With MVC	Decided /In The Process of Implementation	Still Under Consideration	No Wish to Implement		Not Aware of MVC
						Wage Structure Already Flexible	MVC Related Concerns	
All Firms	Dec 07	100.0	34.7	0.9	11.1	7.8	37.4	8.1
	Dec 06	100.0	37.2	1.0	11.9	7.5	37.2	5.2
Unionised	Dec 07	100.0	75.4	0.7	7.3	4.0	12.2	0.3
Establishments	Dec 06	100.0	75.0	0.5	9.7	2.9	11.5	0.4
Non-Unionised	Dec 07	100.0	16.4	1.0	12.8	9.5	48.7	11.6
Establishments	Dec 06	100.0	17.4	1.3	13.1	9.9	50.6	7.8

Note : Figures may not sum up due to rounding

Nearly all the firms which did not wish to implement or were not aware of the MVC were non-unionised (96%) and SMEs (90%).

Table 20 : Distribution of Establishments That Did Not Wish to Implement or Were Not Aware of MVC by Union Status and Establishment Size, December 2007

Union Status	Per Cent				
	Total	25– 49	50 – 99	100 – 199	200 & Over
All Establishments	100.0	38.9	35.6	15.4	10.1
Unionised Establishments	4.3	1.6	0.9	0.7	1.2
Non-Unionised Establishments	95.7	37.4	34.7	14.7	8.9

Note : Figures may not sum up due to rounding

The top three common reasons cited by firms that were aware of MVC but ruled out the possibility of adopting it were that MVC was not widely adopted in their industry (22%), it would make the wage structure more complex (17%) and their wage systems is already flexible (16%). The latter includes 9.1% indicating they were able to cut basic wages without introducing MVC and 6.7% who felt that their wage structure was already flexible (e.g. sizeable component of the wage is commission based). Other concerns raised were employees might not be receptive to MVC (14%), MVC was not in line with their HQ's wage structure (13%) and that the implementation and monitoring work would be administratively burdensome (8.7%) and working out implementation guidelines (e.g. under what circumstances employers can cut MVC) would be difficult (7.6%).

Table 21 : Distribution of Establishments Which Were Aware of MVC but Did Not Wish to Implement It by Main Reason and Union Status, 2006 and 2007

Main Reason for Not Introducing MVC	Per Cent					
	All Firms		Unionised Establishments		Non-Unionised Establishments	
	Dec 06	Dec 07	Dec 06	Dec 07	Dec 06	Dec 07
Total	100.0	100.0	100.0	100.0	100.0	100.0
Establishments in my industry have not implemented MVC in their wage structure	22.4	22.4	14.1	15.0	22.9	22.7
Wage structure may be made too complex	15.7	17.4	9.9	11.7	16.0	17.7
Establishment's wage structure is already flexible	15.5	15.9	24.0	22.7	15.0	15.5
- <i>Establishment is able to cut basic wages without introducing MVC</i>	8.7	9.1	8.0	9.2	8.7	9.1
- <i>Establishment's wage structure is already flexible (e.g. a sizable component of the wage is commissioned base)</i>	6.9	6.7	16.0	13.6	6.3	6.4
Employees may not be receptive to the introduction of MVC	15.6	13.8	10.3	9.5	15.9	14.1
Introduction of MVC is not in line with HQ's wage structure	11.8	13.0	21.7	23.1	11.2	12.5
Implementation and monitoring work are administratively burdensome	9.4	8.7	9.5	8.1	9.4	8.8
Difficult to work out implementation guidelines (e.g. under what circumstances employer can cut MVC)	8.7	7.6	8.4	7.7	8.7	7.6
Others	1.0	1.2	2.3	2.2	0.9	1.2

Note : Figures may not sum up to 100% due to rounding

Implementation of Variable Bonus linked to KPI

As at December 2007, one in three establishments (34%) had formulated and communicated to their employees the KPI for the payment of variable bonus, slightly higher than 32% in 2006. The adoption of this wage recommendation was more prevalent in the large (51%) and unionised establishments (68%). By employee count, slightly over one in two employees (52%) were in establishments that had variable bonus linked to KP. This was comparable to 53% in 2006 (Table 22).

Information & communications (80%), *financial services* (70%), *community, social & personal services* (64%) and *wholesale & retail* (63%) had among the highest share of employees with variable bonus linked to KPI while *construction* had the least at 19% (Table 4 in Appendix 1).

Table 22 : Distribution of Establishments and Employees in Establishments With Formulated KPI and Communicated the KPI for Payment of the Variable Bonus, 2004-2007

	Period	Per Cent	
		Formulated & Communicated KPI Linked to Variable Bonus	
		Establishment Count	Employee Count
All Industries	Dec 07	33.7	51.9
	Dec 06	32.1	52.8
	Dec 05	31.8	54.2
	Dec 04	29.4	47.1
<i>By Establishment Size</i>			
25-199 Employees	Dec 07	30.9	34.2
	Dec 06	28.5	31.5
	Dec 05	28.3	31.4
	Dec 04	26.9	29.1
200 or More Employees	Dec 07	50.9	64.6
	Dec 06	57.0	67.5
	Dec 05	56.7	70.5
	Dec 04	50.9	62.3
<i>By Union Status</i>			
Unionised Establishments	Dec 07	67.7	78.4
	Dec 06	65.7	75.6
	Dec 05	61.7	78.7
	Dec 04	54.4	70.3
Non-Unionised Establishments	Dec 07	29.8	40.1
	Dec 06	27.7	40.8
	Dec 05	28.1	41.8
	Dec 04	26.8	35.9

Information Sharing

NWC in its 2007/2008 recommendations reiterated that with wider implementation of flexible and performance based wage systems where the reward is closely linked to company's performance, the practice of information sharing on corporate performance and KPIs have become even more critical as these are used to determine rewards for workers. This practice will promote transparency and help to strengthen trust between companies and workers. Nearly all unionised establishments (94%) shared information with their employees compared with three in every five (59%) non-unionised firms ([Chart 17](#)). Overall, around three in four (76%) employees were in establishments that shared information in 2007, slightly lower than 79% a year ago, weighed down by the drop in share for employees in non-unionised establishments (66% from 69%) even as the employees covered in the unionised sector remained high (97% in both 2007 and 2006) ([Chart 18](#)).

Chart 17 : Proportion of Establishments That Share Information With Employees by Union Status, 1999-2007

Chart 18 : Proportion of Employees in Establishments That Share Information With Employees by Union Status, 1999-2007

As expected, information sharing was more prevalent among firms with a flexible wage system. About two in every three (68%) establishments with at least one wage recommendation shared information with their employees compared with only about one in two (46%) of establishments without any wage recommendations.

Table 23 : Proportion of Establishments and Employees in Establishments That Shared Information With Employees by Union Status and Type of Wage System, December 2007

Union Status	Per Cent					
	All Establishments		With at Least One Wage Recommendation		No Wage Recommendation	
	Establishment Count	Employee Count	Establishment Count	Employee Count	Establishment Count	Employee Count
All Establishments	62.5	75.9	67.9	80.2	45.7	53.3
Unionised Establishments	93.9	97.4	95.0	97.7	81.3	88.7
Non-Unionised Establishments	58.9	66.2	64.0	70.6	44.5	50.4

In 2007, 56% of unionised establishments shared information with their employees at least annually compared with 35% for non-unionised establishments ([Table 24](#)). The proportion of establishments that shared information on a regular basis had risen steadily over time with unionised establishments continuing to outperform non-unionised establishments ([Chart 19](#)). In terms of employees covered, 48% of employees were working in establishments that shared information at least annually, up from 46% in

2006 and more substantially from 36% in 1999 ([Chart 20](#)). The progress of firms in adopting flexible wage system could have contributed to the increasing trend for regular sharing of information.

Table 24 : Distribution of Establishments and Employees by Frequency of Information Sharing and Union Status, December 2007

Frequency	All Establishments		Unionised Establishments		Non-Unionised Establishments	
	Establishment Count	Employee Count	Establishment Count	Employee Count	Establishment Count	Employee Count
Total	62.5	75.9	93.9	97.4	58.9	66.2
Regularly	36.8	47.5	55.5	64.2	34.6	40.0
Annually	16.0	15.3	25.7	17.4	14.9	14.4

As and when necessary	25.4	28.1	37.5	32.7	24.1	26.1
Others	0.3	0.3	0.9	0.5	0.2	0.1

Note : Figures may not sum up due to rounding

Chart 19 : Proportion of Establishments That Shared Information at Least Annually by Union Status, 1999-2007

Chart 20 : Proportion of Employees in Establishments That Shared Information at Least Annually by Union Status, 1999-2007

8 CONCLUDING REMARKS

Amid the strong economic performance and tight labour market, workers across the levels enjoyed larger nominal wage increase in 2007, the highest in seven years. However, real wage gains were moderated by the rise in inflation. Following the contraction of productivity, the gains in real wages outstripped productivity for the third consecutive year, adding to cost pressures on businesses. Nevertheless, over a longer period of five years or more, growth in productivity still exceeded real wages.

More SMEs and non-unionised firms have joined the larger and unionised firms in adopting wage flexibility. This has made our wage systems more flexible and responsive to changing business conditions, with more firms narrowing the maximum-minimum salary ratio and linking variable bonus to KPI. However, the implementation of MVC slipped slightly in 2007, amid a churn in firms. The most common reasons cited by employers for not adopting the MVC was that it was not their industry norm, it would make the wage structure more complex and their existing wage structure was already flexible. If firms in Singapore could further increase their wage flexibility, it would enable them to adjust their wages more quickly to stay cost competitive. At the same time, it would help enhance the job security of workers amid an uncertain economic environment.

APPENDIX 1

Table 1 : Proportion of Employees With Some Form of Wage Flexibility by Key Wage Recommendations, December 2007

Employees	Some Form of Wage Flexibility (A) + (B) + (C)	Key Wage Recommendations Implemented							Per Cent
		Three (A)	Two (B)			One (C)

HIGHLIGHTS

ON OCCUPATIONAL WAGES, 2007

- Reflecting the premium on skills and responsibilities, managers received the highest median gross monthly wages at \$6,101 in June 2007. This was followed by professionals at \$4,030. The third highest paid was the group of associate professionals & technicians at \$2,789. Clerical (\$1,932) and sales & service workers (\$1,851) were paid close to \$2,000. Among blue-collar occupations, the production craftsmen (\$2,110) were paid more than plant & machine operators (\$1,780). The lowest paid was the group of cleaners, labourers & related workers with a median gross pay of \$968.
- Wages were commonly observed to rise with age, especially for occupations at the higher end. The pace of wage increase with age was more pronounced with the managerial and professional groups. The link between age and earnings was less obvious for lower skilled and blue-collar occupations. Their wages rose only slightly with age and peaked early in their thirties. Thereafter, advancing age appeared to work against them as wages typically declined, given the “physical” nature of their jobs.
- All occupational groups enjoyed wage gains over the past decade, except for the group of cleaners, labourers & related workers whose median gross wage was almost unchanged. Consequently, the wage differential between the various occupational groups relative to the lowest paid group of cleaners, labourers & related workers widened from a decade ago.
- Similar to the experience in many other countries, females in Singapore generally earned less than males. The gender wage gap in professional, managerial and clerical occupational groups was significantly narrower than in blue-collar occupations. The gender wage gap also varied with age, with the wage differential generally smaller in the younger age groups. In fact, within the age group of 25-29, there were a number of occupational groups where females earned more than males. The gender wage differential mainly stemmed from the tendency for females to disrupt their career for family reasons which reduces the work experience and hence pay, relative to men. Other possible factors included differences in skills, qualifications, job nature/level and personal choices.

SURVEY FINDINGS

ON OCCUPATIONAL WAGES, 2007

1 INTRODUCTION

This report seeks to answer frequently asked questions concerning wages of common occupations in Singapore. It examines wages of different occupations within the same industries as well as similar occupations across different industries, the effects of age and gender on occupational wages, and the changes in the wages over time. As the occupational wage data are based on aggregates of similar jobs, it can only serve as a guide for expected wages of individuals, given that no workers and jobs are totally alike¹ and wages are determined by prevailing market conditions.

The wage data are obtained from the Occupational Wage Survey, 2007 on a representative sample of private sector establishments each with at least 25 employees conducted by the Central Provident Fund (CPF) Board on behalf of the Ministry of Manpower. The wages captured refer to basic and gross monthly wages (excluding bonuses and profit sharing) of full-time private sector employees who contributed to CPF in the month of June 2007. The survey covered an effective sample of 2,909 private sector establishments employing some 216,270 CPF contributors on a full-time basis.

2 MONTHLY BASIC AND GROSS WAGES

Reflecting the premium on skills and responsibilities, managers received the highest median gross monthly wages at \$6,101 in June 2007. This was followed by professionals at \$4,030. The wages of the group of professionals typically suffer from a downward bias created by professionals who are promoted to managerial positions and hence no longer classified as “professionals” and the entry of fresh graduates into the job market. The third highest paid was the group of associate professionals & technicians at \$2,789. Clerical (\$1,932) and sales & service workers (\$1,851) were paid close to \$2,000. Among blue-collar occupations, the production craftsmen (\$2,110) were paid more than plant & machine operators (\$1,780). The lowest paid was the group of cleaners, labourers & related workers with a median gross pay of \$968 ([Chart 1](#)). The top and bottom 5 occupations ranked by the median gross wage for each occupational group are listed in [Appendix 1](#).

¹ For example, some jobs have better working conditions and fringe benefits than others and not all workers have the same skills, productivity and innate ability.

Besides median wage, one can also look at the range of wages paid to the middle 50% of workers in the occupational group - these are the wages bounded by the 25th and 75th percentile. The middle range of gross monthly wages among managers was \$4,293 to \$9,700 as compared to \$750 to \$1,450 for cleaners, labourers & related workers in June 2007. The ratio of the 75th to 25th percentile wage shows the spread of wages within the occupational group. Not surprisingly, the managerial group had the highest ratio of 2.26, reflecting a wide diversity of occupations within this group, ranging from restaurant managers to managing directors. They were closely followed by sales & service workers with a ratio of 2.16.

Chart 1 : Monthly Gross Wage by Occupational Group, June 2007

Note : Figures in parentheses refer to the ratio of the third to first quartile wages.

Expectedly, in occupations where the remuneration typically included payment of commissions, allowances (e.g. shift, food, and transport) and overtime, there was a significant gap between gross and basic wages. For example, in sales & service and blue-collar occupations, gross wages were about 15 to 40% higher than basic wages ([Table 1](#)). On the other hand, there was little difference between the basic and gross wages among managers and professionals. Their variable pay usually takes the form of performance bonuses, profit sharing and stock options which are not captured in this survey.

Table 1 : Median Monthly Gross and Basic Wages by Occupational Group, June 2007

Occupational Group	No. Covered	Median (\$)		Gross Wage as Ratio of Basic Wage
		Gross Wage	Basic Wage	
Managers	33,280	6,101	6,000	1.02
Professionals	32,563	4,030	3,825	1.05
Associate Professionals & Technicians	52,892	2,789	2,500	1.12
Clerical Workers	30,826	1,932	1,719	1.12
Sales & Service Workers	22,213	1,851	1,328	1.39
Production Craftsmen	9,518	2,110	1,655	1.27
Plant & Machine Operators	17,416	1,780	1,340	1.33
Cleaners, Labourers & Related Workers	15,902	968	840	1.15

High- and Low-Paying Occupations

Expectedly, many of the occupations with median monthly gross wage in the top 10% were from the managerial, professional, and associate professional & technician groups. Topping the list were specialised surgeons (\$22,196), managing directors (\$15,200), general surgeons (\$13,781), general managers (\$11,950) and commodities futures brokers (\$10,693).

Occupations in the bottom 10% were paid a median gross wage ranging from around \$700 to \$1,350. Within this group, the better paying occupations were electronic equipment/component assemblers (\$1,349), pest exterminators (\$1,341), room steward/chambermaids (\$1,325), private security guards (\$1,278) and hospital attendants (\$1,260). Cleaners, food & drink stall assistants, building painters, labourers & related workers were paid significantly lower at around \$750 to \$800. Details are in [Appendix 2](#).

3 GROSS WAGE BY AGE

Wages were commonly observed to rise with age, especially for occupations at the higher end. The traditional human capital model hypothesizes that as workers gain experience and skills and become more productive, their pay tends to rise over time. This correlation is reinforced by the seniority-based wage system in some

companies. The pace of wage increase with age was more pronounced with the managerial and professional groups. In 2007, relative to the pay of those in the younger age group of 25 - 29, the median gross wage of professionals rose to 1.25 times for those aged 30 - 34 and continued to advance to 1.58 times for professionals aged 40 - 44 and more gradually to around 1.6 to 1.7 times for those older. The rise in wages was even steeper for managers with those in their 40-44 earning nearly twice as much as younger managers aged 25 - 29, before stabilizing thereafter. This partly reflected the differences in job scope of managers, with the mature group having a higher concentration of senior managers overseeing more employees and resources, compared to the younger cohorts (Chart 2).

The link between age and earnings was less obvious for lower skilled and blue-collar occupations. Their wages rose only slightly with age and peaked early in their thirties. Thereafter, advancing age appeared to work against them as wages typically declined, given the “physical” nature of their jobs. This was observed with production craftsmen, plant & machine operators and sales & services workers. In the case of cleaners, labourers & related workers, the wages were largely flat in the earlier age groups, before declining for those in their 40s onwards to a low of 0.63 for the 60 - 64 age group. The exception was the group of clerical workers whose wages rose with age to peak at 45 - 49 years, but the rise was more gradual as compared to managers and professionals.

Chart 2 : Ratio of Median Monthly Gross Wage Relative to Age Group 25 – 29 by Age and Occupational Group, June 2007

4 WAGE TRENDS

In order that wage trends are not affected by the compositional changes in the age profile of the workers, the analysis in this section will focus on workers in the same age group of 35 – 39 years. Generally, workers in this age group are near to or at the prime of their careers.

All occupational groups enjoyed wage gains over the past decade, except for the group of cleaners, labourers & related workers whose median gross wage was almost unchanged ([Table 2](#)). Consequently, the wage differential between the various occupational groups relative to the lowest paid group of cleaners, labourers & related workers widened from a decade ago.

Table 2 : Median Monthly Gross Wage of Workers Aged 35 – 39 Years by Occupational Group, 1997 -2007 (June)

Occupational Group	June 1997			June 2007			Annualised Wage Change, 1997-2007 (%)
	No. Covered	Wage (\$)	Ratio to Lowest Paid Group	No. Covered	Wage (\$)	Ratio to Lowest Paid Group	
Managers	5,833	5,337	4.13	7,295	6,300	4.86	1.7
Professionals	4,041	4,120	3.19	6,574	4,630	3.57	1.2
Associate Professionals & Technicians	8,385	2,642	2.04	9,041	2,981	2.30	1.2
Clerical Workers	6,936	1,750	1.35	4,578	2,056	1.59	1.6
Sales & Service Workers	2,130	1,756	1.36	2,586	2,600	2.01	4.0
Production Craftsmen	3,145	1,998	1.55	1,211	2,250	1.74	1.2
Plant & Machine Operators	6,379	1,547	1.20	2,313	1,962	1.51	2.4
Cleaners, Labourers & Related Workers	2,083	1,293	1.00	907	1,296	1.00	0.0

5 WAGES BY INDUSTRY

This section looks at the median gross wages of workers aged 35 – 39 across the industries in four occupational groups, namely managers, professionals, associate professionals & technicians and clerical workers. Comparison of wages in the other occupational groups across industries would not be meaningful as they are typically concentrated in one or two industries.

Managers aged 35 – 39 continued to be the highest paid in the *financial industry* (\$9,241) in June 2007, pulled up mainly by the high earners such as managing directors (\$21,992) and general managers (\$12,300). They were followed by managers in *professional services* (\$7,600) and *information & communications* (\$6,991). Those working in *hotels & restaurants* (\$3,071) continued to have the lowest median monthly gross wage, weighed down by a large presence of restaurant managers who were paid less (\$2,602) (Table 3).

Professional services (\$5,228), *transport & storage* (\$5,109) and *administrative & support services* (\$6,886) were the top paymasters for professionals. The professionals in *administrative & support services* were mainly engaged as IT professionals such as computer & information systems managers (\$8,550) and systems designers and analysts (\$7,450).

Both associate professionals & technicians and clerical workers in the 35 – 39 age group were paid the highest in *professional services* with a median monthly gross wage of \$3,260 and \$2,460 respectively. On the other hand, clerical workers in *construction* (\$1,500), *hotels & restaurants* (\$1,650) and *administrative & support services* (\$1,730) were among the lowest paid.

Table 3 : Median Monthly Gross Wage of Workers Aged 35 – 39 by Industry and Occupational Group, June 2007

Occupational Group	Managers (\$)	Professionals (\$)	Associate Professionals & Technicians (\$)	Clerical Workers (\$)
Total	6,300	4,630	2,981	2,056
Manufacturing	5,886	4,366	3,090	1,916
Construction	4,200	3,430	2,645	1,500
Services	6,618	4,900	2,948	2,125
Wholesale & Retail Trade	5,600	4,555	3,067	1,950
Transport & Storage	5,230	5,109	3,150	2,246
Hotels & Restaurants	3,071	3,400	2,292	1,650
Information & Communications	6,991	4,803	3,170	2,443
Financial Services	9,241	4,763	2,961	2,134
Real Estate & Leasing Services	5,750	3,950	2,700	1,963
Professional Services	7,600	5,228	3,260	2,460
Administrative & Support Services	5,910	6,886	2,920	1,730
Community, Social & Personal Services	4,988	4,500	2,378	1,862

6 WAGES BY GENDER

Similar to the experience in many other countries, females in Singapore generally earned less than males. The gender wage gap was narrowest in professional (5.0%), managerial (5.4%) and clerical (9.2%) occupational groups where women were paid close to that of men in the same age group of 35 -39. The wage gap widened in blue-collar occupations to as much as 47% for the group of plant & machine operators. This could reflect the different jobs that males and females hold within the occupational group. For instance, females tend to concentrate in occupations such as electronic equipment/component assemblers which typically pay less than the male dominated crane & hoist operators ([Table 4](#)).

Table 4 : Median Monthly Gross Wage for Workers Aged 35 – 39 by Gender and Occupational Group, June 2007

Occupational Group	Gross Wage (\$)		Gender Wage Difference ¹ (%)
	Males	Females	
Managers	6,449	6,100	5.4
Professionals	4,709	4,472	5.0
Associate Professionals & Technicians	3,186	2,842	10.8
Clerical Workers	2,203	2,000	9.2
Sales & Service Workers	2,827	2,163	23.5
Production Craftsmen	2,326	1,679	27.8
Plant & Machine Operators	2,475	1,305	47.3
Cleaners, Labourers & Related Workers	1,436	994	30.8

¹ Gender Wage Difference = $(1 - (\text{Female Median Gross Wage} / \text{Male Median Gross Wage})) \times 100\%$

The gender wage gap also varied with age. For the younger age group, the wage differential was generally smaller. In fact, within the age group of 25-29, there were a number of occupational groups where females earned more than males by as much as 14% for sales & service workers, 12% for managers and 6.5% for professionals in June 2007. With age, more women are likely to take career breaks from work to care for their family which reduces their work experience and hence pay, relative to men ([Chart 3](#)).

Chart 3 : Gender Wage Difference (%) by Occupational and Selected Age Groups, June 2007

Besides the differences in work experience, the other reasons contributing to the gender wage gap included differences in skills, qualifications and job nature/level. In some cases, the pay differential could also reflect the personal choice of women to take lower paid jobs to concentrate on their families.

7 MONTHLY COMMENCING WAGE

This section focuses on the commencing wage which refers to the wage that is paid to a new employee without any prior relevant working experience. Jobs requiring professional and specialist skills continued to fetch a higher starting salary, as employers placed a premium on skills and knowledge. In June 2007, the group of professionals started at the median gross monthly wage of \$2,720, followed by \$1,800 for associate professionals & technicians. At the other end was the lower skilled group of cleaners, labourers & related workers with starting gross wage of \$750 per month. The other occupational groups had median gross monthly wage of over \$1,000 to \$1,500 (Chart 4).

Chart 4 : Monthly Commencing Gross Wage by Occupational Group, June 2007

Occupations with High and Low Commencing Wage

Professionals

Engineers continued to be the highest paid among entry-level professionals, namely chemical engineers (\$2,885), semi-conductor engineers (\$2,870), software engineers (\$2,650), manufacturing engineers (\$2,640) and quality control engineers (\$2,600). Amid strong competition of programmers from low-cost countries, application programmers and network, systems & database administrators started lower at a median salary of \$2,187 and \$1,825 respectively (Table 5).

Table 5 : Median Monthly Commencing Gross Wage of Professionals, June 2007

Top 5	No. Covered	\$	Bottom 5	No. Covered	\$
Chemical Engineer	8	2,885	Civil Engineer	8	2,250
Semi-Conductor Engineer	13	2,870	Application Programmer	7	2,187
Software Engineer	34	2,650	Social Work Professional	13	1,972
Manufacturing Engineer	9	2,640	Network, System and Database Administrator	12	1,825
QC Engineer	5	2,600	Producer (Stage, Film, Television and Radio)	11	1,800

Associate Professionals and Technicians

Reflecting the diversity of occupations from blue-collar technicians to white-collar executives, there was a wide spread of wages within the group of associate professionals and technicians from \$2,750 for bank officers to around \$1,500 for technicians and \$1,000 for pre-primary education teachers.

Table 6 : Median Monthly Commencing Gross Wage of Associate Professionals and Technicians, June 2007

Top 5	No. Covered	\$	Bottom 5	No. Covered	\$
Bank Officer	7	2,750	Electrical Engineering Technician	7	1,559
Operations Executive (Including Warehousing and Shipping Executive)	16	2,400	Computer Technician	9	1,550
Buyer	5	2,237	Mechanical Engineering Technician	27	1,540
Sales Representative (Technical)	16	2,200	Building Technician	6	1,510
Graphic Designer	11	2,200	Pre-Primary Education Teacher	15	1,000

Clerical Workers

Clerical workers started at a median gross wage of \$1,500 in June 2007. The highest paid were the personnel/human resource clerks (\$1,695) while the data entry operators were paid the least at \$800.

Table 7 : Median Monthly Commencing Gross Wage of Clerical Workers, June 2007

Top 5	No. Covered	\$	Bottom 5	No. Covered	\$
Personnel/Human Resource Clerk	17	1,695	Office Clerk	183	1,301
Computer Operations Clerk	7	1,665	Receptionist	26	1,251
Purchasing Clerk	12	1,600	Filing Clerk	15	1,250
Shipping Clerk	24	1,600	Stock Records Clerk	26	1,136
Storekeeper	21	1,600	Data Entry Operator	5	800

Sales and Service Workers

Sales & service workers received a median gross wage of \$1,159 in June 2007, weighed down by the large presence of waiters and hawkers/stall holders who started lower (at around \$1,050) than captains/waiter supervisors (\$1,444).

Table 8 : Median Monthly Commencing Gross Wage of Sales and Service Workers, June 2007

Top 3	No. Covered	\$	Bottom 3	No. Covered	\$
Captain/Waiter Supervisor	10	1,444	Cook	25	1,156
Private Security Guard	52	1,223	Waiter	48	1,063
Shop Sales Assistant	54	1,200	Hawker/Stall Holder (Prepared Food or Drinks)	63	1,049

Note : Only 6 occupations with commencing gross wage were available in this group.

Production Craftsmen

Among production craftsmen, motor vehicle mechanics earned the most with an entry level pay of \$1,719, followed by electricians (\$1,300), machinery mechanics (\$1,250) and carpenters (\$800).

Table 9 : Median Monthly Commencing Gross Wage of Production Craftsmen, June 2007

Top 2	No. Covered	\$	Bottom 2	No. Covered	\$
Motor Vehicle Mechanic	5	1,719	Machinery Mechanic	7	1,250
Electrician	6	1,300	Carpenter	7	800

Note: Only 4 occupations with commencing gross wage were available in this group.

Plant and Machine Operators

Plant & machine operators had a median monthly commencing gross salary of \$1,317 in June 2007. New entrants working as van drivers were paid the most at \$1,482. At the bottom end, electrical/electronic products quality checkers and testers and electrical equipment/component assemblers were paid the least at \$852 and \$608 respectively.

Table 10 : Median Monthly Commencing Gross Wage of Plant and Machine Operators, June 2007

Top 4	No. Covered	\$	Bottom 3	No. Covered	\$
Van Driver	37	1,482	Metalworking Machine Setter-Operator	24	1,125
Electronic Equipment/Component Assembler	26	1,405	Electrical/Electronic Products Quality Checker and Tester	5	852
Plastic Product Machine Operator	11	1,311	Electrical Equipment/Component Assembler	7	608
Lorry Driver	39	1,250			

Note : Only 7 occupations with commencing gross wage were available in this group.

Cleaners, Labourers and Related Workers

Cleaners, labourers & related workers as a group received a median commencing gross wage of \$750 in June 2007, pulled down by a sizeable number employed in the lower paid office cleaner positions (\$675). Store hands (\$1,344), godown labourers (\$1,334) and lorry attendants (\$1,246) were paid significantly more.

Table 11 : Median Monthly Commencing Gross Wage of Cleaners, Labourers and Related Workers, June 2007

Top 5	No. Covered	\$	Bottom 5	No. Covered	\$
Store Hand	30	1,344	Cleaner (Industrial Establishment)	6	800
Godown Labourer	27	1,334	Manufacturing Labourer and Related Worker	32	760
Lorry Attendant	19	1,246	Ship and Ship Tank Cleaner	11	750
Kitchen Assistant	31	1,078	Construction Labourer and Related Worker	8	712
Hospital Attendant	24	1,030	Office Cleaner	162	675

8 CONCLUDING REMARKS

Skilled workers continued to receive a wage premium over those lesser skilled. This attests to the value of undertaking education and training to enhance wage and employment prospects.

PART II

Survey Coverage and Methodology

SURVEY COVERAGE AND METHODOLOGY

SURVEY ON ANNUAL WAGE CHANGES

Introduction

The *Survey on Annual Wage Changes, 2007* was conducted by the Manpower Research and Statistics Department of the Ministry of Manpower from 18 December 2007 to 06 March 2008. The survey was conducted under the Statistics Act (Chapter 317).

Objective

The survey was conducted to obtain information on the extent of wage changes and progress of wage restructuring in the private sector in 2007.

Coverage

The survey covered establishments in the private sector. The sampling method for the survey was based on stratified random sampling. All unionised establishments with 10 or more paid employees were surveyed. For the non-unionised sector, all establishments with 250 or more employees were surveyed. A systematic random sample was then drawn from the remaining establishments stratified by industry and employee size group to obtain an optimal sample size so as to achieve a reasonable accuracy of the survey results.

This sampling methodology yielded an effective sample of 3,996 establishments, of which 954 were unionised and 3,042 were non-unionised. These establishments employed 299,647 rank-and-file employees and 164,206 junior and 45,647 senior management staff who were in continuous employment of at least 1 year. The survey response rate was 88.1%.

Methodology

The survey was conducted using mail questionnaires with clarifications made over the phone.

Reference Period

The reference period for the survey was from November/December **2006** to November/December **2007**.

Data Collected

The establishments were asked to provide information on the average payment of basic wage change, Annual Wage Supplement (AWS) and variable bonus to employees in 2007. The information collected pertains to full-time employees on the CPF scheme who had been with the establishment for at least one year as at 30 Nov 2007.

The establishments were also surveyed on the progress of wage restructuring in terms of whether they had adopted the three key recommendations of the Tripartite Taskforce on Wage Restructuring namely:

- (i) implement variable bonus linked to Key Performance Indicators (KPI) i.e. have formulated and communicated to their employees, the KPI for the payment of the variable bonus;
- (ii) introduce the Monthly Variable Component (MVC) in wage structure;
- (iii) narrow the maximum-minimum ratio for the majority of their employees to an average of 1.5 or less.

Information pertaining to other aspects of the wage system (e.g. whether establishment was satisfied with the level of flexibility of the wage system) was also collected.

Analysis

The first section of the report on the extent of wage changes in private sector in 2007 is based on private sector establishments with at least 10 workers.

The second section of the report on wage restructuring outcome is based on private sector establishments with at least 25 workers, unless otherwise specified. This is to be comparable with figures for the inaugural Survey on Wage Restructuring as at June 2004.

Classification

The industries of the surveyed firms were classified according to the Singapore Standard Industrial Classification (SSIC) 2005.

Concepts and Definitions

Rank-and-File Employees	:	This includes employees who are in technical, clerical, sales, service, production, transport-related and cleaning positions. They are not employees in managerial or executive positions.
Junior Management Staff	:	This refers to executives and managers who do not hold senior managerial responsibilities. They do not have substantial influence over hiring, firing, promotion, transfer, reward or discipline of employees.
Basic Wage	:	This refers to the monthly basic pay before deductions of the employee's CPF contributions and personal income tax. It excludes employer's CPF contributions, bonuses, overtime payments, commissions, allowances (e.g. shift, food, housing and transport), other monetary payments and payments-in-kind.
Basic Wage Increase	:	This usually comprises wage adjustments and built-in increments such as annual (or service), merit and NWC increments. Promotional increments are <u>excluded</u> .
Annual Wage Supplement (AWS)	:	This refers to the annual payment usually made at year-end. It is also commonly known as the 13 th month allowance.
Variable Bonus	:	This refers to the payment given over and above the AWS or 13 th month allowance. It includes incentive payments and "ang pows". The variable bonus is usually linked to firm and/or individual's performance and may vary from year to year. It may be paid in a lump sum or divided into several payments over the year (in which case the several payments should be added together).

Annual Variable Component	: This usually consists of 2 components i.e. the AWS and variable bonus. Generally, the annual variable component is linked to company's profitability.
Monthly Variable Component (MVC)	: This refers to the component of monthly basic wage that can be adjusted expeditiously in response to changing business conditions. It should attract CPF, overtime pay, allowances, etc. The MVC can be built-up through wage increase or "hived off" from basic wage.
Local Employees	: This refers to Singaporeans and Permanent Residents.
Low Wage Local Employees	: This generally refers to local employees who earn a monthly gross salary of around \$1,200 or less on a full-time basis

Formulae

- Basic Wage Change in 2007

$$= \frac{\text{End 2007 Basic Wage} - \text{End 2006 Basic Wage}}{\text{End 2006 Basic Wage}} \times 100\%$$

- Total Wage Change in 2007

$$= \frac{2007 \text{ Total Wage} - 2006 \text{ Total Wage}}{2006 \text{ Total Wage}} \times 100\%$$

where

Total Wage = Annual Basic Wage + Annual Variable Component (i.e. AWS and Variable Bonus)

SURVEY COVERAGE AND METHODOLOGY

OCCUPATIONAL WAGE SURVEY, 2007

Introduction

The *Occupational Wage Survey, 2007* was conducted by the Central Provident Fund (CPF) Board on behalf of the Ministry of Manpower from July to December 2007. The survey was conducted under Section 76 (1) of the CPF Act (1999 Edition) which empowers the Board to collect and compile statistics relating to employers and employees.

Objective

The survey was conducted to obtain wage statistics of common occupations.

Coverage

The survey covered only establishments in the private sector. A representative sample of private sector establishments with at least 25 employees, stratified by industry, was surveyed. The effective sample was 2,909 private sector establishments covering some 216,270 CPF contributors in full-time employment. The survey response rate was 89.7%.

Methodology

The survey was conducted through mail questionnaires. Employers were required to provide information on their employees' wages and job titles. Only employees contributing to the CPF were covered.

Reference Period

The survey reference period was the month of June 2007.

Data Collected

Four types of monthly wage statistics were collected, namely commencing basic & gross, basic and gross wages. Wages for the daily and hourly rated contributors were converted to their monthly equivalence using appropriate expansion factors.

The following types of contributors were excluded for the tabulation of monthly basic and gross wages :

- Apprentices/Trainees;
- Temporary workers;
- Part-time workers;
- Piece rated workers; and
- Workers who worked part month in the month of June 2007

In addition, workers whose pay is based on commission were excluded for the tabulation of monthly basic wage. As for the tabulation of monthly commencing basic & gross wages, besides all of the abovementioned exclusions, managerial occupations which typically require experience are also excluded.

Wage data by gender and age were obtained by matching the survey data with the CPF Board's administrative records.

Classification

The occupations of the CPF contributors and the industries of the surveyed establishments were classified according to the Singapore Standard Occupational Classification (SSOC) 2005 and Singapore Standard Industrial Classification (SSIC) 2005 respectively.

Analysis

The analysis of the data will be made principally using the median concept to lessen the "extreme scores" effect. The median is less sensitive to extreme scores than the mean, making it a better measure for highly skewed distributions¹ such as wages which can be skewed by a relatively small number of higher earners at the top end of the distribution.

¹ Rice Virtual Lab of Statistics

Statistical Notes

The following should be noted when using wage data obtained from the survey :

- Changes in occupational wage levels over time should be interpreted with care. The changes not only reflect wage increases paid to the workers but also the changes in composition within the occupational group. For instance, a large increase in new entrants into a particular occupation may depress the average wage level for that occupation. Data may also fluctuate year to year due to sampling variability.
- The occupations of the CPF contributors surveyed were based solely on the job titles provided by their employers. This may result in lower wage data for certain occupations, especially those requiring professional qualifications, when a significant number of contributors without the necessary qualifications (and earning less than their suitably qualified counterparts) were given such professional titles by their employers.
- The wage data compiled exclude bonuses and profit sharing. The wages for certain occupations, especially those where performance-based bonuses constitute a significant portion of total wage, would be lower than expected. Examples of such occupations are brokers, dealers and senior management staff.
- The occupational wage data presented are those of full-time employees only. This provides a more meaningful basis for comparison of wages across occupations.
- Wages are determined by a host of factors, including the scope, responsibilities, requirements and working environment of the job; as well as the productivity, qualifications, experience and innate ability of the worker. The state of the labour market in terms of the demand and supply factors also influences the wages paid.
- The scope and job responsibilities of CPF contributors classified under the same occupation may vary widely across establishments, especially for occupations like managing director and the various types of managers.

Concepts and Definitions

Establishment	: An establishment refers to an economic unit that produces goods or services at a single physical location and engages in one, or predominantly one type of economic activity. Thus, each branch of a multi-branch organisation at a different location is conceptually a different establishment. However, if in practice the required statistics are centrally kept such that it is not possible to obtain separate data for each individual unit or branch, the organisation or enterprise is treated as a single reporting unit and allowed to submit a consolidated return covering all the units or branches.
CPF Contributor	: This refers to an employee who has made CPF contributions for the month of June.
Monthly Commencing Basic Wage	: This refers to the basic wage paid to a new employee without any prior relevant working experience.
Monthly Commencing Gross Wage	: This refers to the gross wage paid to a new employee without any prior relevant working experience.
Monthly Basic Wage	: This refers to the basic pay before deductions of the employee's CPF contributions and personal income tax. It excludes employer's CPF contributions, bonuses, overtime payments, commissions, allowances (on shift, food, housing, transport etc.), service points (for employees in the hotel and catering business), other monetary payments and payments-in-kind.
Monthly Gross Wage	: This refers is the sum of the basic wage, overtime payments, commissions, allowances, service points and other regular cash payments. However, it excludes employer's CPF contributions, bonuses, stock options, other lump sum payments and payments-in-kind.
Mean Wage	: This refers to the sum of wages of all employees in a particular group divided by the group size.
First Quartile Wage	: This refers to the wage at which one quarter of the employees earn below that amount.
Median Wage	: This refers to the wage at which one half of the employees earn below that amount.
Third Quartile Wage	: This refers to the wage at which three quarters of the employees earn below that amount.

Notes :

- 1 Monthly earnings refer to all remuneration received before deduction of the employee's CPF contributions and personal income tax. They include basic wage, overtime payments, commissions, allowances and other monetary payments, annual wage supplement (AWS) and variable bonuses but exclude employer's CPF contributions.
- 2 Data pertain to all full-time and part-time employees who contribute to the CPF. All identifiable self-employed persons are excluded.
- 3 Industries are classified based on SSIC 2005.

KEY STATISTICS ON GRADUATES FROM INSTITUTIONS OF HIGHER EDUCATION, 2005–2007^p

Institutions	Employment Rate (%)									Monthly Gross Starting Salary (\$) of Graduates in Full-time Permanent Employment			
	Full-time Permanent			Part-time/Temporary			Total			2005	2006	2007 ^p	
	2005	2006	2007 ^p	2005	2006	2007 ^p	2005	2006	2007 ^p	Mean	Mean	Mean	Median
Universities	82.2	86.2	89.8	9.4	7.1	4.7	91.6	93.3	94.5	2,496	2,636	2,867	2,750
Polytechnics													
Fresh Graduates	69.8	72.1	75.3	21.6	19.3	17.7	91.4	91.3	93.0	1,659	1,711	1,805	1,700
Post-NS Graduates	77.7	79.9	82.3	13.1	11.2	10.4	90.8	91.1	92.7	1,975	2,029	2,171	2,000
ITE													
Fresh Graduates	n.a.	54.1	71.1	n.a.	33.9	21.8	n.a.	88.0	92.9	n.a.	1,242	1,273	1,217
Post-NS Graduates	n.a.	70.0	79.8	n.a.	20.2	14.2	n.a.	90.3	93.9	n.a.	1,521	1,554	1,400

- Notes : 1 Employment rate refers to the proportion of economically active graduates (i.e. graduates who have entered the labour market) who were employed as at the reference date, approximately 6 months after completing their final examinations.
- 2 Full-time permanent employment refers to employment of at least 30 hours a week and where the employment is not temporary. It includes those on contracts of one year or more.
- 3 Part-time or temporary employment refers to employment of less than 30 hours a week and where employment is casual, interim or seasonal. It includes those on contracts of less than one year.
- 4 Monthly gross starting salary comprises the basic salary, fixed allowances, overtime pay and commissions. Bonuses are excluded.
- 5 Fresh graduates refer to those who had completed their studies in the year and were not liable for National Service (NS) after graduation or had already completed their NS.
- 6 Post-NS graduates refer to male graduates who had completed their studies about 2 years earlier. For example, 2007 data refers to male graduates who completed their full-time NS between April 2006 and Mar 2007 for Polytechnics and ITE graduates.
- 7 Universities refer to Nanyang Technological University (NTU), National University of Singapore (NUS) and Singapore Management University (SMU).
- 8 Polytechnics refer to Nanyang Polytechnic (NYP), Ngee Ann Polytechnic (NP), Republic Polytechnic (RP), Singapore Polytechnic (SP) and Temasek Polytechnic (TP).
- n.a. Not Available.
- p Data are preliminary.

Source : *Graduate Employment Surveys* conducted by various universities

Notes :

- Universities refers to Nanyang Technological University (NTU), National University of Singapore (NUS) and Singapore Management University (SMU).
- Employment number refers to those who responded to the survey and indicated they were employed on a full-time permanent basis as at 1 Nov 2007.
- Employment rate refers to the proportion of economically active graduates (i.e. graduates who have entered the labour market) who were employed on a full-time permanent basis as at 1 Nov 2007 (i.e. approximately 6 months after completing their final examinations).
- Full-time permanent employment refers to employment of at least 30 hours a week and where the employment is not temporary. It includes those on contracts of one year or more.
- Monthly gross starting salary comprises the basic salary, fixed allowances, overtime pay and commissions. Bonuses are **excluded**.
- Data on law and medical graduates were not reflected as a significant number of them were still doing practical law course/ reading in chambers or serving housemanship.
- s Data have been suppressed because the number of employed graduate respondents was less than 10.
- n.a. Not Available.
- p Data are preliminary.

Notes :

- 1 Data covered 2 cohorts of graduates who completed their full-time training in Dec 2006 and Mar 2007, and were surveyed on their employment status as at July 2007 and Oct 2007 respectively (i.e. approximately 6 months after completing their final examinations).
 - 2 Fresh graduates refer to those who had completed their studies in 2007 and were not liable for National Service (NS) after graduation or had already completed their NS.
 - 3 Post-NS graduates refer to male graduates who had completed their studies in 2004 and their full-time NS between April 2006 and Mar 2007.
 - 4 Employment number refers to those who responded to the survey and indicated they were employed on a full-time permanent basis at the time of survey.
 - 5 Employment rate refers to the proportion of economically active graduates (i.e. graduates who have entered the labour market) who were employed on a full-time permanent basis as at the reference date (i.e. approximately 6 months after completing their final examinations).
 - 6 Full-time permanent employment refers to employment of at least 30 hours a week and where the employment is not temporary. It includes those on contracts of one year or more.
 - 7 Monthly gross starting salary comprises the basic salary, fixed allowances, overtime pay and commissions. Bonuses are excluded.
- s Data have been suppressed because the number of employed graduate respondents was less than 10.
n.a. Not Available.
p Data are preliminary.

National Wage Council (NWC) Wage Guidelines

NATIONAL WAGES COUNCIL (NWC) GUIDELINES FOR 2008/2009

1. The National Wages Council (NWC) has completed its deliberations on wage and wage-related guidelines for 2008/2009. In its deliberations, the Council took into account the following factors:

- 2007 Economic performance, labour market conditions, productivity, wages and inflation
- Singapore's cost competitiveness
- Uncertain economic outlook for 2008
- High inflation in 2008

2007 Economic Performance, Labour Market Conditions, Productivity, Wages and Inflation Trends

2. The Singapore economy grew by 7.7% in 2007, lower than the 8.2% gain in 2006. The strong economy led to a record employment growth of 234,900 in 2007, far surpassing the 176,000 in 2006, with all major sectors registering employment growth. Supported by robust job creation, the seasonally adjusted overall and resident unemployment rates declined to 1.7% and 2.4% in Dec 07, from 2.7% and 3.7% respectively a year ago.

3. Inflation has risen. The consumer price index (CPI) rose from 1.0% in 2006 to 2.1% in 2007. This was driven by higher global commodity prices, strong economic growth and one-off factors like the GST increase.

4. Meanwhile, wages grew strongly last year. Total wages (basic wages plus bonuses) of private sector employees rose by 5.9% in 2007, higher than the increase of 4.5% in 2006. This was the result of a basic wage gain of 4.3%, which was higher than the increase of 3.6% in 2006; and an 8.3% increase in average bonus payout to 2.36 months in 2007, higher than the payout of 2.18 months in 2006. Even though inflation was higher in 2007, resulting in real basic wage increase in 2007 (2.2%) being lower than that in 2006 (2.6%), real total wage increase in 2007 (3.8%) was still higher than that in 2006 (3.5%). (see Table 1 in Annex)

5. On the other hand, labour productivity growth declined from 1.5% in 2006 to -0.9% in 2007. This was partly due to the record employment gains in 2007. A key principle adopted by NWC is that the built-in wage increases should lag productivity growth over the longer term, so that the wage increases would be sustainable while maintaining cost competitiveness. **In 2007, the growth in real basic wages outpaced productivity for the second consecutive year. However, taken over a 5-year or longer period, the productivity growth still exceeded growth in real basic wages** (see Table 2 and Charts at Annex).

Cost Competitiveness

6. Overall Unit Labour Cost (ULC) rose for the third straight year in 2007, reflecting the contraction in productivity and higher wage growth amid the tight labour market. The ULC increase at 3.8% in 2007 is notably higher than the 0.5% rise in 2006. Over a longer period of 5 years, however, ULC has declined by 0.4% p.a., as productivity growth had

generally kept pace with the increase in labour cost. The Relative Unit Labour Cost (RULC) in manufacturing which measures Singapore's labour cost competitiveness relative to 16 other economies rose slightly by 2.2% in 2007 due to the increase in ULC and the appreciation of the Singapore dollar.

Outlook for 2008

7. The global economic outlook for 2008 has deteriorated in recent months. The US sub-prime crisis has led to a broader liquidity crunch. Singapore's economic growth is expected to moderate to 4.0-6.0% this year. Advanced GDP estimates showed that the economy expanded by 7.2% on a year-on-year basis in the first quarter of 2008. **Going ahead, there are some downside risks to growth due to considerable uncertainty in global financial markets and the US economic slowdown.**

8. Preliminary estimates show that employment growth in the first quarter of 2008 was 68,400. Based on the GDP forecast, MOM expects continued employment growth, though it will likely be lower than the record gains in 2007. The bulk of the new jobs will be in the services sector and there will be sufficient jobs for locals, including new entrants into the labour market.

9. Higher global commodity prices have filtered into domestic prices of food and oil-related items. Although inflation is currently expected to be at the upper half of the 4.5-5.5% range in 2008, **the external factors driving inflation remain volatile and the situation has to be monitored closely.** Inflation rose sharply to 6.6% in the first quarter of 2008 compared to the same period of last year. Part of the increase was due to the revision in annual values of HDB flats, but it does not affect most Singaporeans' cost of living in cash terms as they own the flats. Inflation may moderate somewhat in the second half as the effects of one-off factors like the GST increase wear off.

NWC Wage Guidelines

Push for Productivity Improvement

10. Productivity drives sustainable wage increases. It is therefore important to ensure that wage increases lag productivity growth over the longer term. While this has been the case over the past 5 years, the gap has narrowed, partly due to the tight labour market and strong employment growth in recent years. The NWC therefore emphasises the importance of productivity improvement. In this regard, **the NWC strongly urges the government, companies and workers/unions to work together in a concerted effort to improve productivity through innovation, job re-design and stepping up of the training of workers through the enhanced Continuing Education and Training (CET) system.** This will help workers to acquire relevant skills, upgrade their existing skills and raise their productivity, as well as enable them to take on higher value-added jobs and enhance their earning capacity.

Grant Sustainable Wage Increase Commensurate with Performance and Prospects

11. In recommending the wage guidelines this year, the NWC has taken, among other factors, two special considerations into account, namely the global economic uncertainty and the high inflation this year. The NWC notes that workers, especially the low wage workers, are concerned about the high cost of living. However, the Council is also careful that pushing up wage increases to keep pace with the high inflation rate will undermine

our competitiveness and will not be sustainable over the longer run. In this regard, any wage adjustments should take into account the slew of measures amounting to over \$3 billion this year that the Government has already put in place which will help Singaporeans cope with the inflation impact. These include the GST Offset Package¹, Budget 2008's surplus sharing package² as well as the Workfare Income Supplement (WIS) scheme which helps to encourage employment of low-wage workers and boost their income and CPF savings. In addition, the Government announced at this year's Budget that it would extend its freeze on fees and charges to the end of the year. The appreciation of the Singapore dollar exchange rate has helped to dampen inflationary pressures. NTUC is also helping workers to partially defray the higher cost of living through its distribution of NTUC "U Stretch" vouchers to low wage workers.

12. Given the economic uncertainty, the NWC recommends that **companies grant built-in wage increase commensurate with the companies' performance as well as business prospects to ensure that such increases are sustainable. Companies should make greater use of variable payment to reward workers for their contribution to corporate performance, taking into consideration the total wage increase to be given. As with previous years, companies which have done exceptionally well and with continued good prospects should consider granting workers a higher variable payment.**

One-off Special Payment for Rank-and-File Workers

13. To further help workers cope with the impact of higher inflation this year, taking into account Government's assistance measures and the ability of the company to pay, **companies should consider giving a one-off special lump sum payment to rank-and-file workers, with heavier weightage for low wage workers.**

Other Wage-Related Recommendations

Enhancing Employability of Older Workers

14. The NWC welcomes the government's announcement to legislate re-employment by 2012 to enable workers to work beyond age 62. **The Council strongly urges employers to work with unions/workers to implement re-employment policies and systems as soon as possible, by adopting the Tripartite Advisory on Re-employment of Older Workers** issued by the Tripartite Implementation Workgroup (TIWG). Employees are also encouraged to work longer and prepare themselves for re-employment.

15. The Council notes that there is a large pool of people who are not working, especially women. Compared to the 74.0% resident employment rate of males aged 55 to 64, the employment rate of females in the same age group is much lower at 38.6%. The NWC urges employers who are in need of workers to look into attracting this group to join the workforce.

¹ Including GST Credits, Senior Citizens' Bonus, Utilities-Save, Service and Conservancy Charges and Rental Rebates, Property Tax Rebate.

² Including Growth Dividends, Personal Income Tax rebates, Medisave top-ups and top-ups to the Post Secondary Education Account

16. Employers can tap on the ADVANTAGE! and Flexi-Works! Schemes for financial assistance in recruiting, retaining and re-employing older workers.

Enhancing Efforts to help Low Wage, Contract and Informal Workers

17. To help low wage workers including contract and informal workers benefit from the WIS and improve retirement adequacy, **the NWC urges the tripartite partners to step up efforts to help them contribute to their CPF** so that they can be eligible for WIS and participate in CPF LIFE. Employers could also consider making top-ups to their workers' CPF accounts to enhance their retirement adequacy, and enjoy tax deduction for doing so. **As with previous years, companies that are granting wage increases could include a dollar quantum for built-in wage increases as well as variable bonus payments to benefit the low wage workers more.**

18. To help contract workers, many of whom are low wage workers, **companies outsourcing work are urged to adopt the Tripartite Advisory on Responsible Outsourcing Practices.** In doing so, they could help such workers employed by their outsourced service providers to enjoy better employment terms and conditions including CPF contributions. The Advisory also encourages companies to adopt best sourcing practices and award contracts based on performance rather than headcount. This will help prevent compromises on service quality and workers' wages.

Enhancing Wage Flexibility

19. Over the years, the tripartite partners have worked at implementing flexible and performance-based wage system. Good progress has been made, with 84% of the workforce in the private sector under some form of flexible wage system, up slightly from 83% a year ago. As a more responsive wage system will enable companies to make quick adjustments to wage cost in line with changing business conditions, the NWC would like to urge companies to step up efforts to enhance their wage flexibility. This includes the introduction and building up of the Monthly Variable Component (MVC) as well as reducing the maximum-minimum salary ratio to better reflect the value of the job.

Monitoring the Situation

20. As the outlook of the economy and inflation remains uncertain, the Council urges the government, employers and unions to monitor closely the situation and the impact on companies and workers.

Application of NWC's Recommendations

21. The NWC recommendations cover the period from 1 July 2008 to 30 June 2009.

22. These recommendations are applicable to all employees – management, executives and rank-and-file employees, unionized and non-unionised companies in both the public and private sectors.

23. To facilitate wage negotiation, companies should share relevant information on company performance and business prospects with employees and their representatives.
24. The NWC looks forward to the Government's acceptance of its recommendations.

NATIONAL WAGES COUNCIL (NWC) GUIDELINES FOR 2007/2008 (ISSUED IN MAY 2007)

Economic and Labour Market Performance in 2006

1. In 2006, the economy grew strongly by 7.9%, up from 6.6% in 2005. All major sectors registered positive growth during the year, led by manufacturing, wholesale & retail trade and financial services.

2. On the back of the strong economic growth, the labour market continued to strengthen. A record 176,000 jobs were added, surpassing 2005's gains of 113,300. All major sectors registered employment growth and the seasonally-adjusted unemployment rate remained at 2.6 per cent in December 2006.

Productivity, Wages and Inflation

3. Labour productivity rose by 1.2% in 2006, down from an increase of 2.1% in 2005. The moderation was due to the stronger employment creation compared to the previous year. Wholesale & retail, manufacturing, transport & storage and financial services saw gains in productivity while the other sectors registered declines.

4. The consumer price index (CPI) rose by 1.0% in 2006, following a 0.5% gain in the previous year.

5. Total wages rose by 4.5% in 2006, slightly higher than the 4.3% in 2005. This was the result of a basic wage gain of 3.6%, as against 3.1% in 2005 and an increase in bonus payout from 2.06 months in 2005 to 2.18 months in 2006. After adjusting for the increase in CPI, real total wage rose by 3.5% in 2006, lower than 3.8% in 2005. Real basic wage rose by 2.6% in 2006, the same as in 2005³.

Cost Competitiveness

6. In 2006, Singapore's unit labour cost continued to decline. The unit labour cost for the overall economy and manufacturing sector fell by 0.5% and 3.6% respectively. However, measured against Singapore's key competitors, the relative unit labour cost for the manufacturing sector increased slightly by 1.5% after four consecutive years of decline. Nevertheless it remained lower than the level in 2004.

Outlook for 2007

7. The Singapore economy grew by 6.1% in the first quarter of 2007. The labour market also continued to strengthen. Preliminary estimates show that employment grew strongly by 48,000 in the first quarter of 2007, higher than the gains of 45,000 in the same period a year ago. The seasonally adjusted overall unemployment rate was 2.9% in March 2007, an increase from 2.6% in December 2006. The rise in unemployment rate reflects more people entering the labour market in response to the favourable economic conditions.

8. The economic outlook for 2007 is generally healthy but some downside risks remain. These include a sharp slowdown in the US economy, vulnerability of oil prices to

³ 2006 Survey on Annual Wage Changes conducted by MOM.

supply shocks and a disorderly unwinding of global unbalances. Taking these factors into consideration, the Ministry of Trade & Industry (MTI) has forecast 2007 growth to be in the range of 5% to 7%. CPI inflation is projected to come in at 0.5% to 1.5%. The Ministry of Manpower expects employment creation to continue to be robust in 2007, in tandem with healthy economic growth.

NWC Guidelines for 2007/2008

(A) Wage increase for good performance

9. In the light of the strong economic performance in 2006, the positive outlook for 2007 and the tightening labour market, **the NWC recommends that companies should grant wage increase to workers for their contributions to good corporate and economic performance. However, built-in wage increase should continue to be sustainable in the long run and lag behind productivity growth. Where a built-in wage increase may not be sustainable, companies could moderate the increase and grant workers higher variable bonuses. Wage increase and bonus payment should be more closely linked to company and individual performance.**

10. Companies performing exceptionally well should consider giving one-off special bonuses to workers.

11. The NWC also notes that the employers' CPF contribution rate will be raised by 1.5 percentage points⁴ from 1 July 2007. This will enable workers to benefit from economic growth and to help them build up their CPF savings. In granting wage increases, companies should take into account the 1.5 percentage point restoration in employers' CPF contribution as well as the lower CPF contribution rates for older low wage workers as such contributions are part of the overall wage package.

Enhance productivity to sustain wages and cost competitiveness

12. Productivity improvement is key to sustainable wage increases. The NWC notes that in 2006, the growth in wages exceeded productivity gains for the second consecutive year. However, cumulatively since 1997, productivity growth still outpaced increases in real total and basic wages, though the gap has narrowed (see [Annex A](#)). **The NWC therefore urges employers and unions/workers to work together to enhance productivity and innovation**, so that we can sustain increases in output and wages whilst maintaining our cost competitiveness.

13. To improve productivity, training and skills upgrading are crucial. The NWC notes that the WDA together with NTUC have been building up the continuing education and training infrastructure for adult workers. All workers, whether they are low-skilled workers or professionals, managers, executives and technicians (PMETs), are encouraged to take advantage of this to upgrade themselves and keep pace with the changes in the economy.

⁴ The employer's CPF contribution increase will not apply to workers earning \$1,500 or less a month and aged above 35 years.

(B) Employ older workers and re-employ those above age 62

14. The NWC strongly supports the recommendations in the final report of the Tripartite Committee on Employability of Older Workers which was released on 17 May 2007. The Council also welcomes the Government's decision to adopt the Committee's recommendation to introduce legislative changes to facilitate opportunities for older workers to work beyond age 62.

15. Over the next few years, before legislation is introduced, **the NWC urges companies and unions to work together to implement policies and programmes to recruit and retain more older workers and re-employ those workers beyond the age of 62, by adopting the Tripartite Guidelines on the Employability of Older Workers above age 62. The NWC also urges companies to move to job-based, competency-based and/or performance-based wage systems⁵ so that workers are rewarded according to the value of the job and their contribution. Companies should also embark on job redesign to make jobs more suitable for older workers and encourage them to upgrade their skills and enhance their employability.**

(C) Help low wage and informal workers

16. The NWC supports the Government's efforts to help low wage workers through implementing the Workfare Income Supplement (WIS). The WIS and CPF changes will help but cannot address all the challenges faced by low wage workers. The NWC notes that many unionized companies have implemented the Council's recommendation to grant higher wage increases to low wage workers. **To further help these workers, the Council recommends the following:**

- a. In granting wage increases, companies to give higher increases to low wage workers. This could be done by specifying a higher percentage increase and/or by including a dollar quantum for built-in wage increases. They could also apply the same principle for the payment of variable bonuses.
- b. Employers and unions work with the government in a tripartite effort to reach out to and help self-employed and low wage/informal workers understand the benefits of WIS, and help them contribute to their CPF so that they can be eligible for WIS.
- c. The tripartite partners continue to work together to help low wage/informal workers upgrade their skills and enhance their job value and job security through job re-creation. Emphasis should be placed on those working in SMEs⁶, older workers and contract workers, so that they continue to be employable and their earning capacity can be enhanced.
- d. Companies outsourcing work to implement best sourcing based on standards and performance and not just price alone. This would achieve sustainable value for money and avoid compromising on quality and workers' wages.

⁵ Job-based wage system focuses on responsibilities of the job while competency-based wage system focuses on the ability of the individual worker to do the job. A performance-based wage system looks at how well the worker performs on the job.

⁶ MOM's 2005 survey on Employer Supported Training showed that larger establishments (96% for establishments with 250 and more employees) were more likely to provide training than those smaller (66% for establishments with 25-99 employees).

(D) Flexible and performance-based wage systems

17. The NWC also urges companies to step up implementation of flexible wage systems to ensure sustained competitiveness.

18. The Council notes that the max-min salary ratio for rank-and-file workers has come down from more than 2.0 in the 1980s, to 1.85 in the 1990s and to the current 1.54. However, for junior management, the ratio has remained high at 1.72 in December 2006. Workers should be paid according to the value of the job and the performance of the individual and the company. **The NWC recommends that companies continue to narrow the max-min ratio to 1.5 or below.**

19. In addition, companies should leverage on the positive economic climate to introduce and build up the Monthly Variable Component (MVC) in their wage structure. The Council notes that the adoption of the MVC has only improved slightly last year. In December 2006, 37.2% of employees were in companies that implemented MVC compared to 36.0% in December 2005. These companies had set aside an average of 9.0% of monthly basic wages as MVC in 2006, up from 8.1% in 2005 and close to the 10% target. Adoption rate of MVC amongst non-unionised companies, however, continues to be low⁷. **The NWC therefore recommends that companies granting built-in wage increase should use the increases to build up the MVC.** Companies that have already achieved 10% MVC could consider building up the MVC further.

20. The NWC notes that progress has been made in linking rewards to company and individual performance through use of appropriate key performance indicators (KPIs). In December 2006, more than 50% of the workforce was rewarded this way.

Share company information with employees

21. With the wider implementation of flexible and performance based wage systems where reward is closely linked to company's performance, the practice of information sharing with employees is even more critical. **This practice helps to strengthen trust between companies and workers, as information on corporate performance and KPIs are used to determine rewards for workers.** The NWC reiterates the importance of this practice.

Application of NWC's Recommendations

22. The NWC recommendations cover the period from 1 July 2007 to 30 June 2008.

23. These recommendations are applicable to all employees – management, executives and rank-and-file employees, unionized and non-unionised companies in both the public and private sectors.

⁷ 75.0% of employees in unionized companies were in companies that implemented MVC in Dec 2006, compared to 73.1% in Dec 2005. Meanwhile 17.4% of employees in non-unionised companies were in companies that implemented MVC in Dec 2006, compared to 17.1% in Dec 2005

Conclusion

24. With the good economic performance, positive economic outlook as well as the strong labour market, companies should reward workers with wage increases and bonuses. At the same time, companies and workers should enhance productivity and innovation and push ahead with wage restructuring to increase flexibility and responsiveness.

25. As the labour market tightens, companies should do more to employ and retain more older workers and encourage more women to enter the workforce. Vulnerable segments of the workforce, in particular, low wage/informal workers, should benefit from the fruits of economic prosperity. This will require concerted effort from government, unions and employers to help such workers be eligible for WIS to supplement their income and savings, but more importantly to upgrade their skills, enhance their employability and earn higher wages over time. With our strong tripartite cooperation built up over the years, the NWC is confident that this can be achieved while sustaining our economic competitiveness.

26. The NWC looks forward to the Government's acceptance of its recommendations.

Just released

Singapore Yearbook of Manpower Statistics, 2008

Date of Release: 30 Jun 2008

The Report provides a wide range of statistics on the labour market situation. These include key data on labour force, job vacancies, retrenchments, labour turnover, wages, hours worked, conditions of employment, labour relations, workplace injuries, higher education and skills training.

Report on Wages in Singapore, 2007

Date of Release: 30 Jun 2008

The Report presents information on salaries of over 300 occupations as well as wage changes and bonuses paid in various industries. It also includes information on the extent to which employers have restructured their wage systems. The Report also provides earnings data collected by the Central Provident Fund Board and the starting salaries of the 2007 graduates from local universities, polytechnics and ITE. Additionally, the *National Wages Council (NWC) Wage Guidelines for 2008/2009* are included in this Report, along with information on the extent to which employers have restructured their wage systems.

The '*Report on Wages in Singapore, 2007*' presents information on salaries of over 300 occupations as well as wage changes and bonuses paid in various industries. It also includes information on the extent to which employers have restructured their wage systems. The Report also provides earnings data collected by the Central Provident Fund Board and the starting salaries of the 2007 graduates from local universities, polytechnics and ITE. Additionally, the *National Wages Council (NWC) Wage Guidelines for 2008/2009* are included in this Report.
